SKILLS

Malware Analysis	Risk Analysis
Intrusion Detection	Python Scripting
Linux	Security Analysis
Incident Response	Social Engineering
Reverse Engineering	Wireshark
Risk Mitigation	OSINT
Fundamental Knowledge about Networking	IT Technical Fundamental Support
Threat & Vulnerability Management	Identity & Access Management
Data Security & Information Lifecycle Management	Communication Skills
Problem Solving	Technical Skills

CERTIFICATIONS

Learning Cyber Incident Response and Digital Forensics Linkedin	April 2021
Cybersecurity Awareness: The Internet of Things (IoT) Linkedin	November 2020
Mobile App Security Cybrary	May 2020
Python for Data Science IBM	May 2020
Technical Support Fundamentals Google	May 2020
CISCO IT Security Makeover Cisco	April 2020
Internet Connection: How to Get Online? Cisco	April 2020

AWARDS

College First Swaminarayan College of Engineering and Technology	August 2018
I achieved this medal from my college for the First rank in the computer department.	
Top 2 Science Student Talent Search	June 2013
I earned this certificate from the Gujarat Secondary board for my great performance in science subject in 8th Standard and got 500 INR demand draft from Gujarat Board.	

SUMMARY

I have conceptual and detailed knowledge of cyber security, penetration testing, digital forensics, and incident response management. I have more than 2 years of experience with government and NGO programmes and other international companies. I have fundamental knowledge of information gathering, enumeration, vulnerability analysis, vulnerability management, and risk mitigation. I have an Associate Certification in Fundamentals of Networking and Information Security and recently completed my undergrad in Computer Engineering. To obtain a job as an information security engineer, or cyber security engineer. I am ready to use my computer science skills towards industrial approaches and build my career.

WORK EXPERIENCE

Anti Cyber Crime Society Anti-Phishing Team Member	(December 2020 - January 2022)
Responsibilities:	
- Reporting the fake/spam/phishing sites and presenting proper documentation. - Developing a sense of awareness and alertness among the society so that people can safeguard themselves. - To eradicate cyber-psychological ill-effects. - To make cyberspace more secure.	
Virtually Testing Foundation Cyber Security Intern	(January 2021 - April 2021)
Responsibilities:	
- Learning Kubernetes Courses. - Hands-on learning of VMware Software Defined Data Center.	
Anti Cyber Crime Society Cyber Security Intern	(November 2020 - December 2020)
Responsibilities:	
- Collecting fake/spam/phishing sites from real world. - Reporting to the organization.	

EDUCATION

University of Hertfordshire MSc Cyber Security with Advanced Research	(January 2021 - January 2023) Pursuing
Course Work: Distributed Systems Security, Information Security, Management and Compliance, Digital Forensics, Penetration Testing, Cyber Operations, Legal and Ethical Practice Exercise.	
Team Research and Development Project: An Analysis of Deaths Caused by Road Accidents Among States of USA in Regards to Gender using R language.	

Swaminarayan College of Engineering and Technology B.Tech Computer Engineering	(August 2016 - August 2020)
---	-----------------------------

PROJECTS

Digital Forensic Examination	(January 2021 - April 2021)
Project Activities:	
- Case Management, Investigation done by different Methodologies, Finding Evidences and -Analysis, Contemporaneous notes: process, analysis and clarity. - To independently conduct digital evidence aspects of an investigation in the terms of collection and acquisition. - To critically analyze and evaluate digital evidence for reporting in a forensically sound manner. - To apply knowledge in the current technological issues in digital forensics	
Tools: Autopsy, EnCase, FTK Imager, CaseNotes.	
Pentesting Server	(February 2021 - March 2021)
Project Activities:	
- Attack narrative on the bases of Grey-box Testing as well Planning and Scoping, Reconnaissance and Enumeration, Mapping and Service Identification, Vulnerability Analysis, Vulnerability risk and mitigation. - Critically analyze and evaluate security techniques used to protect complex heterogeneous environments and apply their findings for offering advice regarding solutions to decision makers. - Apply advanced and current concepts/issues of computer systems risks, vulnerabilities, threats analysis, and software security in the context of a penetration test. - Use initiative for autonomously conducting and managing a penetration test, within a complex and unpredictable environment, demonstrating a systematic approach of creatively applying knowledge in unfamiliar contexts for solving problems.	
Using Tool: Nmap, OpenVAS, Nikto, Armitage, Metasploit Framework.	

Information Classification and Handling Policy	(October 2021 - November 2021)
Project Activities:	
- In this policy, I made draft an "Information Classification and Handling Policy" along the lines of the ISO27000 family for the university. In particular I referred 'ISO 27001 A.8.2 Information Classification' to ensure that information receives an appropriate level of protection in accordance with its importance to the organization. - I advised to include an appropriate classification scheme and a clear set of policy statements with controls and examples of how the information should be handled.	
Related Work: Consideration of issues, Risk identification and threat assessment based on Information Security.
