

Wensum Trust Three School Visit Summary (Jan- Feb 2020)

DPE were asked by Chris Everard (Director of Operations & Finance) to visit three Wensum Trust schools between January and February 2020. The three schools visited were: **Alderman Peel, Lodge Lane and Burnham Market.**

The visit at Alderman Peel included a full audit and discussion around organisational, technical and best practice with members of the leadership team and GDPR champion. The two visits at Lodge Lane and Burnham were completed with office staff and focused on awareness sessions and audit walks. Full details for each visit can be obtained from the individual school reports.

All staff spoken to were proactive and keen to identify if there were any gaps in current practice and enthusiastic as to where they could continue to make improvements. The following summary is in three parts:

1. Organisational, Policy and Procedural documentation. This details the documents that staff should now be familiar with and where it might be worth revisiting if needed, especially for new staff;
2. Making use of the DPE website;
3. Audit walk findings – main points detailed and amalgamated with information pertaining to individual schools, detailed in the visit reports for that school.

1. Organisational/Policy Documentation

Continue to raise staff awareness with the following documents:

- **GDPR Policy and Privacy Notice** – in addition to making available to parents, all staff including caretaking staff should be aware of and have access to these documents;
- **SAR Procedure** – prioritise to LT and senior admin staff. There is also a 'bitesize' training module that can be completed on the DPE website;
- **Data Breach Procedure** – all staff should understand reporting requirements and who to report a data breach to. There is also a 'bitesize' training module that can be completed on the DPE website;
- **Clear Desk Policy** – available to all staff and all staff should be aware;
- **Working away from School Policy** – available to all staff and all staff should be aware;
- **Password Policy** – available to all staff and all staff should be aware. Password management and maintaining passwords was discussed at Lodge Lane and Burnham and I suspect this is something that would be of benefit to look at practice and raise awareness across the Trust. There is also a 'bitesize' training module that staff can complete on the DPE website;
- **Photo and Video Guidance** – prioritise to LT, Admin, PE, Drama, Head of Year;
- **Consent** – prioritise to LT, Admin, Pastoral. It's worth checking periodically, via internal walks with GDPR champions, that consent matches what is on display in individual schools;
- **FOI Policy** – Should be understood and available to senior staff and senior admin;
- **Retention Schedule** – Senior admin & LT to have overview. How is the retention schedule applied in practice across the Trust?
- **DPIA** – LT and middle managers should understand when a DPIA is required and how to complete one;

- **Cyber Essential Questionnaire** – if not already, it's worth getting the IT technicians to complete: <https://kb.dataprotection.education/best-practice-library/documents/information-technology-security/7-crest-cyber-essentials-questionnaire>

2. DPE website

- DPE Best Practice areas, Checklists, Compliance Manager and Online Training can continue to be used to demonstrate compliance within each organisation. New bite size training now includes: Password Security, SAR, Data Breach, Clear Desk and Physical Security modules.

3. Audit walks

Refer to individual reports for more details regarding individual visits.

Visitor signing in system:

There was no reference to the Trusts Privacy Notice.

- **Advisory:** Add information at reception to inform visitors where they can access the school's privacy statement from i.e. school website.

SEND Offices, front offices pastoral and headteacher offices:

- Depending on the risks, DPE have found a quick fix is to add keycode entry to offices used by key staff and specialist staff i.e. SENCOs. The Front office at Burnham has increased risks as it is accessed by parents (refer to report);
- Reminder to staff to regularly review data on display and in folders and to add sensitive data to available secure storage. Best practice guidance can be obtained from: <https://kb.dataprotection.education/best-practice-library/documents/drip-feeds/57-dpe-quick-reference-guide> and was also distributed during visits.

Secure printing/photocopying:

- Consider adding secure printing, or option of, for schools that do not have this activated.

Security of servers:

- The server at Burnham was in the ICT room but was easily accessible. I would review how many schools within the Trust have servers that are not in secure rooms, or do not have security cases.

End of day routines – iPads

- DPE recommends schools develop procedures to ensure iPads can be accounted for daily and data (i.e photos) can be cleared if lost or stolen (Erase your device). Does each organisation have a documented procedure?

Pigeonholes:

- Reminder to staff to empty regularly and avoid adding sensitive data. Sensitive data observed at Alderman Peel and Burnham.

Trust staff contact lists:

- SL to discuss with Chris if these need to be on display in schools visited.
