

Hingham Primary School Audit and Visit 2 Report 23.01.19

Report type:	Mini school audit		
School:	Hingham Primary School	Date:	23.01.19
Staff member:	DPE: Stuart Lee HT: Vicky Newrick Admin: Cathy De Micco	Time:	09.30
Policy	Type	Viewed/discussed	
	GDPR data protection policy	Yes	
	GDPR privacy statement	Yes	
	SAR procedure	Yes	
	Breach procedure	Yes	
	Consent forms	Yes	
	Retention schedule	Yes	
	Documents required	Yes	
Data mapping	Type		
	GDPRiS	Yes	
	DPE toolkit	Yes	
	Other (please specify):	Notes:	
Personal data	Explanation/concern	Action Point	Consent obtained

Key points check list

1	School walk	Action recommendations within the walk (detailed below).
2	DPE Knowledge bank	Liaise with admin to get Vicky access to the Knowledge Bank (actioned).
3	Governors and GDPR project team	School to consider:

		- Using the DPE compliance tools (toolkit) as the school's action plan (rag rate). This can also be used to show progress for governors (part completed during visit); - Assigning a Governor to undertake data protection responsibilities and/or add GDPR as a regular item at governor meetings.
4	Data breach procedure and log	- Use the DPE data breach procedure for the school; - Use the data breach/incident log to record centrally and ensure all staff understand the procedure for reporting a data breach (incident); - Consider assigning a governor who can support the school with internal walks/monitoring. Use the log to raise staff awareness and improve practice in school. Note: DPE now have an online data breach log that the school has the option of using.
5	Privacy statement(s)	School to send to DPO@ for review. Update the privacy statement to include third party suppliers (these can be added as an appendix).
6	SAR Procedure and log	Use the DPE SAR Procedure for the School; The SAR log can also be used for recording SARs centrally; Note: DPE now have an online SAR log that the school has the option of using.
7	Training	- Register staff for DPE GDPR e-learning training. Consider key staff initially and then whether all staff to complete (include the GDPR governor); - Continue to use staff meetings/briefings to raise staff awareness; - Encourage staff to self-regulate and check folders/data regularly.
8	Data retention schedule	Develop the school's data retention schedule and archiving of data. Guidance can be obtained from the DfE and IRMS toolkits: https://c.ymcdn.com/sites/irms.site-ym.com/resource/collection/8BCEF755-0353-4F66-9877-CCDA4BFEEAC4/2016_IRMS_Toolkit_for_Schools_v5_Master.pdf https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/747620/Data_Protection_Toolkit_for_Schools_OpenBeta.pdf (Annex 5,1) Example of a school that has completed a schedule is: http://www.recreationroad.com/2014/wp-content/uploads/2018/07/Document-Retention-Schedule.pdf Note: DPE will be providing a record of processing tool that will incorporate data retention for Spring 2019.
9	Consent	Ensure consent aligns with data displayed in school (ongoing process).
10	DPE to provide	- Data breach – levels of incident guide; - More information pertaining to data retention schedules.

Key points visit 1	Key points visit 2
School Walk: Reception/visitor signing in sheet: Review of signing in procedure. Minimise PII data on display/purchase carbon copy signing in book; Add information at reception to inform visitors where they can access the school's privacy statement from i.e. school website (not discussed during visit); Front office/HT office: Door is secure with limited entry. Consider purchasing lockable cabinets due to the nature of files and data that could be on display (Tambour style – sliding doors are becoming standard in many schools for ease of use and practicality); Review data in folders and use as an opportunity to complete a data cleanse. Classrooms/Corridors: Lists/displays/coat pegs: Ensure consistency and use of forename only. Where there is teaching and learning justification this is acceptable, however, schools are adopting forename only and this has become standard practice. Ensure consent forms align with data on display. Staffroom Pigeon holes: Communicate to staff the need to regularly check pigeon holes and remove outdated information; Review whether the staffroom should have key code entry. Archived cupboard: Add a lock to the door or complete a 'reshuffle' to move data to a more secure location; Review data currently in storage with data retention schedule (IRMS) Medical file/area: Review how data is displayed. Could the medical file be added to a cupboard at the end of each day? What data is within the folder – remove outdated records and archive. Tablets: Review technical security and storage of tablets. Can codes be used? Can Tablets be stored securely at night? Can IT install software to securely wipe tablet data if a tablet was lost/stolen?	School Walk: Reception/visitor signing in sheet: School tried confidential but did not get on with the system. Discussed trialling a different system: (https://www.amazon.co.uk/Cherry-Carbonless-Confidential-Visitor-Duplicate/dp/B07DX9RT58) Add information at reception to inform visitors where they can access the school's privacy statement from i.e. school website. Front office/HT office: Now has a lockable drawer. School to continue reviewing of files on display. Are there still files on display that would be better placed in cabinets? Note: MSA is also the care taker and the office is secure with limited access. Classrooms/Corridors: As previous visit, each classroom has lockable storage. Encourage staff to self-regulate, maintain folders and regularly check to ensure data is up to date. Items observed: Journals of school leavers – the front cover still contained leaver information. <u>Vicky is also going to consider locks for each classroom so that end of day routines includes locking each classroom.</u> Staffroom: Communicate to staff the need to regularly check pigeon holes and remove outdated information. <u>Staffroom is having a coded lock for additional security fitted shortly.</u> Archived cupboard: Now purchasing lockable cabinet for additional security. Medical file/area: School has reviewed and added to cabinet and information is locked at night. Still awaiting feedback from staff. IT/Samsung tablets: 20 – 30 tablets. Develop end of day routines so that tablets can be accounted for daily.
