

The Spring Partnership Trust School Audit Report

Audit Date: 14th January 2020

Auditor: Arrienne Stanyon

Hayes Primary

Overview

The school have continued to maintain their high standards and considerate approach towards data protection which has been carried out by the office staff at the school.

The following report provides a summary of the discussion topics during the visit, the visible risks identified and the recommendations for the next steps towards compliance.

Best Practice Checklists

The Best Practice Checklists are available on the Knowledge Bank and can be useful for many different purposes.

Each area contains either a guidance document, model policy or template that can be useful. Associated to each area is a checklist which comprises of a series of questions in relation to the particular area. These will help to direct the school as to what they should be doing in each area as far as personal data is concerned and it forms parts of the next steps for GDPR compliance.

The checklists can be printed and shared with other members of staff or governing bodies in order to track improvements.

Most importantly they will be used to focus future DPE visits so that the Data Protection Officer can be most of use and provide additional support and guidance.

Please endeavour to complete some areas before the next visit.

Training

We discussed training at the meeting, and it was explained that all members of staff need to be data protection trained and the training should be revisited annually.

The school have not completed online training modules on the Knowledge Bank and this needs to covers all members of staff, with a completion rate of at least 90%.

Additional training resources are now live. These short modules (5-10minutes) include:

- Subject Access Request
- Personal Data Breaches
- Information Security
 - Clear Desk
 - Physical Security
 - Data Classification
 - Password Security

These modules can be used as a refresher training by members of staff who commit a breach or by staff who have completed their Year 1 data protection training as it provides different advice and adds to their current data protection knowledge.

Please also ensure any new members of staff are trained when they join.

Subject Access Request and Breach Review

Breaches-

The school have 0 breaches on the Knowledge Bank.

All breaches within the school, regardless of their severity, should be logged.

Additionally, it is crucial to ensure staff are trained to recognise breaches and understand who to inform and where the access the breach procedure.

Subject Access Requests-

The school currently do not have any SAR's logged on the Knowledge Bank. Please ensure all members of staff are aware of how to recognise a SAR and of the next steps to take so that all requests can be dealt with promptly and in compliance with data protection laws.

Observations

- **Breaches**

2 breaches have taken place that should be logged on the Knowledge Bank including a laptop hard drive missing. It is advised to change code on the door where laptop was when hard drive was taken.

- **Knowledge Bank Review**

Spring Partnership Trust data protection policies are available on the Knowledge Bank but Natalie was not aware they were there or where else to find them. Ensure key members of staff are aware of how to access the policies should they need them.

- **Knowledge Bank Review**

The document upload function on the Knowledge Bank was explained so that the school may take use of this function in the future

- **Talk Through Previous Audit Report and What Has/Not Been Actioned**

- Have put up leave it lock it posters across the school where there is a computer
- The orange folders in the office- SLT want to keep but then so it has been advised that they must be out of view with the bare minimum inside. Birthdays and other unnecessary data have been removed
- The office staff now do walk rounds to identify any risks from data being available
- Digital leaders now remove photos from tablets termly
- Passcodes have been attempted but it is difficult due to mac server and issues with policies. It has been recommended they try to take photos on iPads that have passcode.
