Information security - cyber essentials and NCST training

Record of Processing (RoP) - methodology and where we are at

We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice.

Nicky has started the process of completing the record of processing. Part of the consultation was spent completing a record of processing and risk assessment for using Motional.

Step 1 - a general introduction to the RoP tool with a brief overview of the generic process relating to financial/management of the school.

Step 2 - a more in depth look at the RoP with key process owners and how completing the master lists will ensure the school reflects the technical measures and procedures it has in place to safeguard personal data.

Note: Step 3 – online workshops and group sessions to support schools with further individual sessions as needed.

Actions:

- SL to send NB master third party lists - attached.
