

School: Preston & Saxlingham Primary Schools (Tas Valley Federation)

Date: 22/06/2021

Report: Record of Processing - Online Meeting

DPE: Linda Mortimer

School members: Diana Hill (Preston Primary) and Julie Jones (Saxlingham Primary)

Cyber Security

The issue of cyber security was discussed at the time of the meeting following Preston Primary's cyber attack in the previous week. The school worked closely with their IT Technician to limit further damage to the systems and have a good understanding of how to respond to such an attack and prevent further incidences.

DPE strongly recommend that all staff complete DPE's online training 'Staying Safe Online' and 'Password Security' as soon as possible.

Management of the RoP Tool

The schools have decided to maintain their own RoPs in their individual areas on Knowledge Bank. There will be areas that overlap, where practice is identical and for this reason it was agreed that it may be more beneficial for both school secretaries to continue with joint meetings with DPE.

Consultation details

- Overview of the school's requirement to comply with Article 30 of the GDPR – provided at previous meeting held on 2.3.21
- How the personal information is mapped using DPE's RoP tool
- Example of a generic HR RoP
- Demonstration of the master lists, including roles, IT hardware and software
- Reporting functions of the RoP
- DPE online workshops that may be available in Autumn term 2021
- Q and As

An overview of the RoP was provided and discussions on how this tool could be used to help with some aspect of school management when fully completed.

The reporting functions were also explored and it was noted how this could help in general school management ie retention schedules available in one step, also a record of the lawful bases used when processing personal information.

Record of Processing (RoP) - methodology and where we are at

We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice.

Step 1 - a general introduction to the RoP tool with a brief overview of the generic process relating to financial/management of the school – carried out at the meeting held on 2.3.21.

Step 2 - a more in depth look at the RoP with key process owners and how completing the master lists will ensure the school reflects the technical measures and procedures it has in place to safeguard personal data.

Step 3 – online workshops and group sessions to support schools with further individual sessions as needed.

Note: a number of reporting functions are available via the RoP tool and include a detailed retention schedule as well as details of the lawful basis for process. The tool is still being developed and will shortly be able to produce risk reports.

RoP - Progress to date

At the time of this meeting, the following RoPs were reviewed, amended and tailored to reflect the actual practice at each school:

- HR01 Pre-Employment Checks
- HR06 New Starter Procedure
- HR08 Staff Leaver Procedure

RoP - Next Steps

LM is currently compiling a generic list of third parties/software providers and the schools will be asked to highlight those used at each site.

This information will then be imported by DPE to your school's records on Knowledge Bank.

Details of the third parties will then appear in your organisation's RoP as a list when adding third party suppliers. Once this list is imported it will enable the automatic generation of the school's Privacy Notice.

A further online meeting will be arranged for the Autumn Term 2021 and Diana and Julie will work together to complete some RoPs prior to the next meeting.

The focus of the Autumn Term meeting will be to:

To further complete relevant Finance RoPs and prioritise HR RoPs to be tailored for the Tas Valley schools. Review reporting functions of the RoP tool and consider whether any other third parties/software providers should be added to the school's master list.
