

School: St Mary Federation

Date: 13/10/2021

Report: Remote consultation

DPE: Linda Mortimer

School members: Karen Nudds, School Secretary

Consultation details (GDPR refresh)

- DPE website/best practice including: staffing changes and updating on the DPE website
- Compliance - Data Protection Policy and Privacy Notices, Child Friendly Privacy Notice
- The Children's Code
- Review of training
- Information security update - cyber essentials and NCSC training
- Electronic internal audit template (making the rounds) demonstration
- Record of processing (**RoP**) update and next steps
- Confirm future appointments
- Q and As

DPE website/best practice including news updates

The Dashboard - There is a new look to the dashboard and previous details relating to Tickets / SARs / Data Breaches / FOIs have been archived, but can still be accessed in the same way.

The Children's Code - This is a new code of practice which came in to force on the 2.9.21. The code has been created to protect the use of children's personal information and impacts on security measures that are required in applications relating to Education Technology providers as well as online games/platforms used by children, and also Facebook, Tik Tok, Instagram, Whatsapp and other social media.

The full ICO statement on The Children's Code can be read via a link available on Knowledge Bank under the News section. It is worth noting that The Children's Code is otherwise known as "Age-Appropriate Design Code", which further supports the ICO's requirements for child friendly Privacy Notices to be adopted by schools.

Age-Appropriate Privacy Notices - DPE's Child Friendly Privacy Notices can be downloaded from the Best Practice Resource Area – under the heading of 'Transparency'.

Compliance

LM has reviewed the Federation's Data Protection Policy and Privacy Notice and recommends that these are updated to DPE's most recent versions, available on Knowledge Bank.

However, the Federation may choose to wait as they are shortly about to join the DNEAT Trust, who may require the Federation to use the Trust's own policies.

Review of training & Cyber Security

School staff have completed their GDPR 101 training and are now due to take the GDPR Refresher training. (The ICO recommends refresher training should take place on a 2 yearly basis). There is a 20-minute GDPR refresher course available to all staff on Knowledge Bank.

In light of recent cyber-attacks on Norfolk schools and the ICO recognising that the education sector is at increasing risk from such attacks, DPE recommends that NCSC Staying SafeOnline is completed by all staff and backed up with Password Security training.

Training records were reviewed at the time of the meeting and at present no staff have yet completed the NCSC Staying Safe Online course available on Knowledge Bank. In light of the education sector being at the most risk of cyber attacks DPE recommends that cyber security is kept in the forefront of everyone's mind and the issue raised at staff meetings.

DPE also recommends that schools check with their IT support provider that their software and hardware systems are robust and ask that their provider completes the following Cyber Essentials Questionnaire:

Information security - cyber essentials

Actions:

- As there have been some security concerns within the sector ask your IT provider to complete the cyber essentials questionnaire: <https://dataprotection.education/best-practice-library/documents/information-technology-security>

Phishing Tools - DPE are currently developing Phishing Simulations. There is a link under the News section on Knowledge Bank, explaining how these can be used to check staff behaviour when receiving dubious emails/correspondence as well as monitor the school's resilience, but in a safe environment provided by DPE. These simulations will be available shortly, and Lindsey will demonstrate when she meets online with the school later this term.

Electronic Internal Audit Template - Making the Rounds

An important part of visiting schools had been to carry out an audit walk of the school. With this in mind there is now an online tool 'Making the Rounds' available on Knowledge Bank, which allows schools to self-audit the school premises. This was demonstrated at the time of the meeting on 13.10.21.

Record of Processing (RoP) - and DPE methodology

We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice.

Step 1 - The school's Finance Officer has worked with LM to prioritise Finance RoPs and tailored them to reflect the actual practice at the St Mary Federation.

Step 2 – It was decided at the time of the meeting that further progress with the RoP should be put on hold with the imminent move to DNEAT.

Future Meetings

It was agreed with the School Secretary, that no further RoP meetings are arranged with the St Mary Federation in light of their joining DNEAT.

Should the school require support with any aspect of their GDPR compliance going forward until their service level agreement with DPE expires, they can contact their named DPO. If in this time the school requires support with Tickets, Data Rights Log (SARs), Breaches, FOIs, they can submit the information to the Core DPO legal team, in the normal way, by registering their query on Knowledge Bank and a member of the team will get back to them.
