

School: Hillside Primary **Date:** 18/10/2021

Report: Remote consultation

DPE: Stuart Lee **School member:** Lynsey Boulton

Consultation details

Actions from the summer consultation have been completed. The school continues to have an exceptional approach to data protection in school, which is still being led in part by Lynsey and supported by the school governor and headteacher. The school is at an established stage with the privacy compliance programme. This is evidenced by:

- GDPR policy updated to the latest DPE version
- Privacy notices updated to the latest DPE versions
- Publication scheme completed
- Work away from school policy implemented
- GDPR section on the school website which in addition to the above compliance documents includes, the data breach and SAR procedure.
- The school makes best use of the DPE website i.e. use the compliance manager for maintaining documents
- GDPR awareness training forms part of the induction process for new staff
- Staff complete regular GDPR awareness/training and the school have recently used the DPE training Powerpoint at the July 2021 INSET
- Staff completed NCSC online training
- School governor assigned for GDPR and present when completing onsite audit walks
- DPE SARs and data breach log used

Next steps for the school are detailed below:

1. Information security - cyber essentials and NCSC training

- As there have been some security concerns within the sector, SL signposted LB to the latest news section of the DPE website. DPE will shortly be releasing a phishing simulation that the school can utilise as well.
- Continue to raise staff awareness of cyber incidents, what to be aware of and follow up with any staff yet to complete the NCSC stay safe online training.

The following National Cyber Security Centre has useful school and governor resources that can be accessed:

School resources: <https://www.ncsc.gov.uk/section/education-skills/schools>

Governor Qs for schools: <https://www.ncsc.gov.uk/information/school-governor-questions> - One of the questions is: Does the school train staff on the common cyber threats and incidents schools experience? This is covered in the DPE NCSC training.

2. Data retention

As systems and data move to online environments, review current systems for maintaining data and if not already, establish methods to complete a periodic data cleanse of electronic storage systems.

3. Electronic internal audit (making the rounds)

Demonstrated the online walk during the consultation. The school has the option to complete their own end of day walk and report findings back to staff (raising awareness). Suggested this is completed termly. **LB to action.**

4. Record of Processing (RoP) - and DPE methodology

To comply with article 30 of the GDPR it is a controllers responsibility to maintain an RoP. We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice. To reduce the burden on schools DPE are continuing to populate generic processes that can be mapped across for schools:

Step 1 - a general introduction to the RoP tool with a brief overview of the generic process relating to financial/management of the school - completed.

Step 2 - a more in depth look at the RoP with key process owners and how completing the master lists will ensure the school reflects the technical measures and procedures it has in place to safeguard personal data.

Actions:

- DPE will continue to populate generic RoPs
- LB to identify RoPs that would be useful to check against
- DPE to provide additional reports and updates
- The school to start to utilise the RoP, for example: when introducing new processes and new technologies

5. Questions

The school currently completes their pupil data collection process by sending out blank data forms, with parents being responsible for returning the form.

The school may consider exploring the possibility of completing the data collection process via Pupil Asset. Parents would have secure access to update their details. SL discussed various advantages and risks with LB.

Actions:

If moving to electronic data collection process LB to contact SL who will support with completing an RoP for the process and with completing a risk assessment/mitigations.

LB to check what validation tools there are within the MIS to allow validating changes and if it's feasible for the school to move to an electronic process.
