

Information Sharing Agreement

In relation to: Libresoft Librarian

This individual Agreement is made between:

Libresoft Ltd.

1. Introduction

1.1 Basis for sharing

Our library management system for schools will provide a secure and robust solution for running a school library. In order to achieve this goal and provide this service we will require access to some of the school's data on current and past students and staff. The transfer of data will take place during the install of the system and then again at the start of every academic year in order to delete or archive data for students and/or staff that have left the school, and to import the data of the new students and staff that are joining the school.

1.2 Purpose for the sharing

Schools will be required to share a small amount of their MIS data with Libresoft Ltd. Specifically, the names of the school's current staff and students (details in section 2.1), and names of previous students. We are justified in requiring this data as it is necessary to track which user has each book, and to implement some of the communications features that were requested by our stakeholders, i.e. the ability for the system to contact parents when library books are overdue.

1.3 Length of agreement

This agreement will commence at 00:01 on the day of the renewal of your Libresoft Librarian subscription. This agreement will remain in place while the school has a contract to run the Libresoft Librarian system or until terminated by either party.

1.4 Key Contacts

Name	Position	Contact Details
James Harrap	Managing Director Libresoft Ltd.	37 Courtenay Road, Winchester, Hampshire, SO23 7ER 0330 223 4020
Dan Smith	Lead Developer Libresoft Ltd.	37 Courtenay Road, Winchester, Hampshire, SO23 7ER 0330 223 4020
	School Head Teacher	
	Data Protection Officer	

2. Information Sharing

2.1 Type of information that may be shared

We will require the following data from the school:

User Type	Data required
Student	First name Surname UPN Class Year group Date Of Birth Gender Pupil Premium
Staff	First name Surname

2.2 How the information will be shared

Initial migration of data from old library system: This is a complex process and it would not be reasonable to expect school staff to attempt this on their own. We will remotely connect to a school computer *after* their DPO or other authorised person has input the necessary passwords. We will then complete the migration of the data and disconnect immediately. This will enable to complete the data transfer quickly, with no access to passwords and with minimal exposure of the data.

Frequency of data transfer: after the initial migration of old data, the schools will be responsible for

uploading their data at the start of each academic year.

Transfer: The school will have responsibility to upload their data via a secure HTTPS link and this will usually be done in the first week of September. Any amendments to the data (e.g. students leaving or joining the school) will also be carried out by the school.

Information will be viewed by Libresoft Ltd and authorised subcontractors on a strict need to know basis only, and the data will only be processed by staff in order for them to perform their duties in accordance with one or more of the defined purposes.

Under no circumstances should personal data be processed in any way that is unsecure or left unattended. It is the responsibility of the sender to ensure that the method is secure and that they have the correct contact details for the receiver.

2.3 Recipients and other organisations that the information may be shared with

Libresoft Ltd will store all data used in the Librarian system with a dedicated data hosting service, namely UKFast (<https://www.ukfast.co.uk>). UKFast are ISO27001 Certified and secured to government IL4 standards. Furthermore, all identifying data (name, UPN, DOB) will be stored in an encrypted form.

2.4 Data Quality

It is the responsibility of the school to ensure that all data is adequate, relevant, not excessive, accurate and up to date. We will offer assistance in this only as and when instructed to do so by the school.

2.5 Retention and destruction

Data will be kept on the Librarian system for up to 6 years after the student or teacher last enters the school (in line with current data retention practices). It is the school's responsibility to ensure that records are kept up to date. Most data updates will be performed at the start of the academic year, but there may be amendments to make during the year as people join or leave the school.

2.6 Data subject rights

Any Subject Access Requests, Freedom of Information request, query or complaint received by the school will be actioned by the school. Libresoft Ltd will assist only when instructed by the school and if able to do so.

2.7 Data Security

All data will be stored on dedicated servers in ISO27001 Certified Data Centres. Any sensitive information will be encrypted when being held on the database and all data is encrypted in transit

using HTTPS with a trusted certificate provider.

Access to the live environment is limited to only the Director of the company and the Lead Developer for the purposes of updating and maintaining the system.

No sensitive information will be stored by us other than within the Data Centre in an encrypted format.

All backups of the sensitive data will be kept within the same ISO27001 Certified Data Centre that the live environment is stored and all backups will be encrypted.

3. Obligations to an individual party

Obligations for Libresoft Ltd.

- Limiting access to data once it is on our servers
- Not sharing the data with any party not specified in this agreement or the terms of service

Obligations for the school

- Submission of data
- Incident reporting
- Handling of queries/complaints from individuals affected by the information sharing

4. Review of Agreement

This agreement will remain in force, irrespective of whether the agreement has been officially reviewed, until a notice of termination is served.

This agreement will be reviewed annually to determine whether the data being shared and/or stored has, will or should change.
