

SCHOOL HEADED PAPER

Covid saliva testing for children with special educational needs

Dear Parent/Guardian,

As a school we want to do all we can to minimise the spread of Covid 19 and keep your children and our staff safe.

One of the best ways of achieving this is through regular testing. I am pleased to say we are now able to provide our pupils with saliva tests, which are a more simple and less uncomfortable way to be tested for Covid. We know that the nose and throat tests in general use can be very difficult to administer for some of our pupils, so this is a welcome development that we hope our families will support.

We are working with the Norfolk and Norwich University Hospital NHS Foundation Trust, to provide these tests, known as LAMP tests, for our pupils and staff. These tests are approved by the UK Health Regulators. You can find out more about the LAMP Testing from the questions and answers factsheet further below.

LAMP tests require pupils to provide a fresh saliva sample, by spitting into a pot that will be tested in a laboratory. Samples should be done at home first thing on a Monday, before your child eats or drinks anything (including water) and before they brush their teeth or use mouth rinse. I have attached the LAMP test instructions for you to read.

We would like to offer this weekly test to your child.

We would really like your child to take up this opportunity to help keep our school community as safe as possible. However, all testing remains voluntary.

To take part you need to register with an online NHS portal <https://lantern.nhs.uk/> the first time a sample is taken. I have attached a privacy notice with information about how this data will be used.

It might be that you need school staff to help your child with the test, because it isn't possible at home. If this is the case, then there is a box you can tick on the attached form.

When you receive the result, please let the school know if your result is positive by emailing us at [\[insert school email address for reporting positive results to the school\]](#). The hospital must report any positive Covid-19 results to NHS Test and Trace in the same way other organisations who provide different types of COVID-19 test must do.

Please complete and return the acknowledgement slip below as soon as you are able to:

I acknowledge that my child(child name) will take part in the weekly LAMP testing for COVID

I prefer to register my child myself for LAMP testing and my child will take the samples myself at home. ☐ (tick if applicable)

I prefer for my child to complete their weekly LAMP test at school and for the school staff/medical staff from Norfolk and Norwich University Hospital NHS Foundation Trust to help my child give their sample. I understand that this will mean the school, on my behalf, registering my child for a LAMP test user account with NHS Norfolk and Norwich University Hospital.

Name

Signed **(parent/carer)**

Child's NHS Number: **(10 digits)**

Appendix 1 – Facts and question

How do I register my child?

There is an accompanying help sheet with this letter showing how to register.

Is LAMP testing safe?

Yes – LAMP testing is completely safe and has been approved for medical use. Your child only needs to spit into a pot. This means no more swabbing.

Why do I need to register my child for LAMP tests?

LAMP tests need to be processed in a laboratory by trained staff at the hospital. This means that the hospital need to know who the sample belongs to.

When I register for LAMP testing it asks for my mobile number and email address. I don't have a mobile phone or email address. Can my child still be part of the testing?

Yes – If you contact us at [insert contact details] we can register your child on your behalf and let you know the results of the test. Your child will need to give their sample at school. Please make sure you have ticked the box *'I would like my child to complete their weekly LAMP test at school and give my permission for school staff or medical staff from Norfolk and Norwich University Hospital NHS Foundation Trust to help my child give their sample'* on the permission form that came with this letter.

I don't have internet, how can my child be tested?

Yes – If you contact us at [insert contact details] we can register your child on your behalf and let you know the results of the test. [insert any details on LFD testing still in place or delete]

Why do the hospital tell test and trace if the LAMP test is positive?

LAMP tests are an accurate way to tell if a person has COVID-19 and does not need another test to confirm this. The laboratory is required by law to report any positive cases of COVID-19 to allow NHS Test and Trace to find any close contacts and provide you with advice on what to do.

Can I sometimes do the test at home with my child and sometimes ask the school to do it for me? No – When you register for LAMP testing, your email address and mobile number are used to log in to the account to register a sample to your child. The person registering the sample must have access to the email address and phone number that the account is registered under.

I don't want my child to do LAMP tests, can they still for lateral flow tests (LFD).

[School to insert answer]

I am worried about providing my child's personal information so they can have a test.

The safety of personal information is very important. Your child's personal information will be as safe as if you visited hospital for treatment. You can speak to someone about how your child's personal data is used by contacting [insert trust IG name] on [insert trust IG contact details].

How is my child's personal information used?

Your child's personal information is only used to test if they have COVID-19. If your child does have COVID-19 this will be shared with NHS Test and Trace.

What do I do if I get the results and they are positive, and my child is at school?

It's important that you let us know as soon as possible so we can minimise contact with other pupils. Please contact us on [insert school contact details for reporting a positive result if the child is currently at school]. [School to insert the process they will follow if they are notified of a positive case whilst the child is at school].

My question is not here. Where can I find more information?

If you have any questions or are worried about LAMP testing please contact [insert name] on [insert contact details]

Appendix 2

How to register and take a sample at home

[insert technical guidance i.e how to take a sample, when to take the sample, provide details on the actual process i.e where to collect sample pots and where to drop them off]

[insert Lantern registration process guidance]

What to do if you want your child to give their sample at school

If you want the school to help with your child's LAMP testing, please make sure you have ticked the correct box on the Acknowledgement Form. You will need to provide us with the following information:

[insert process/what happens next for what the parent or guardian must do other than signing the permission slip.]

Privacy Notice

Lamp Saliva Testing for Special Educational Needs and Disability Schools

Introduction

This notice supplements the Norfolk and Norwich University Hospital (NNUH) main Privacy Notice which is available on the internet via <https://www.nnuh.nhs.uk/publication/privacy-notice-v4/>

The Trust has been commissioned by the Norfolk County Council to run a Covid-19 Vaccination Programme for four(4) Special Educational Needs and Disability Schools (SEND) in Norwich.

The participating schools are:

1. One
2. Two
3. Three
4. Four

Purpose of the intended activity

The aim of the programme is to provide Covid-19 LAMP saliva tests for children that cannot tolerate a normal PCR test.

LAMP Testing allows for rapid, scalable diagnostics that can detect SARS-CoV-2 infection and interrogate strain evolution. The use of LAMP tests allows for the identification of children with COVID-19 who do not have symptoms, allowing the SEND Schools to take steps to protect everyone.

Legal basis

UK Data Protection Act (2018)

Article 6 (1)(c) processing is necessary for compliance with a legal obligation to which the Controller is subject.

Article 6(1)(e) ‘...necessary for the performance of a task carried out in the public interest or in the exercise of official authority...’.

and

Article 9(2)(g) ‘processing is necessary for reasons of substantial public interest.’

Nature (type) of data items to be used	• Child's Name • Child's Address • Child's Date of Birth, • Child's Gender • Parent's Name and Contact Number/School Representative's Name and Contact Number. • Parent's Email Address / School Representative's Email Address. Name • Site Location, Address, COVID LAMP-test results, Postcode, Date • Sample Taken • Date Sample deposited • Date test performed • Associated organisation
Recipients or Categories of Recipients of the data necessary for the Programme	Data Controller Controllers make decisions about processing activities. They exercise overall control of the Personal Data being processed and are ultimately in charge of, and responsible for the Processing. Processing means any operation or any set of operations performed upon personal information including, but not limited to, the collection, recording, organisation, storage, updating or modification, retrieval, consultation, use, consolidation, blocking, erasure or destruction of data. • NNUH and the four (4) SEND Schools will act as Data Controllers • NHS Track and Trace - NHS Test and Trace will also acts as Data Controller to help control the rate of reproduction (R), reduce the spread of the infection and save lives. Data Processors Data Processors act on the instructions of the Data Controllers. The Data Processors involved are: • Earlham Institute who will process the LAMP tests to see whether there is a positive or negative result.

	Royal Free London NHS Foundation Trust. The Royal Free will store the data collected because it is the NHS organisation that nationally is responsible for collecting all LAMP testing data across England and reporting on Test Results the Department of Health and Social Care. The Royal Free also makes use other organisation in the following ways: Department of Health and Social Care - To manage Text message and email service for communicating results Cisilion Limited – For Technical support Conjure Limited – For Technical support Google LLC – Cloud storage in the United Kingdom
Retention period	Eight (8) years
Rights to object	You have the right under Article 21 of the GDPR to object to your personal information being processed. Please contact info.gov@nnuh.nhs.uk or the SEND School at [insert school email address for objections to the school], if you wish to object to the processing of your child's data. You should be aware that this is a right to raise an objection which is not the same as having an absolute right to have your wishes granted in every circumstance. In circumstances where it is necessary to share information for compliance with the Data Protection Act 2018, Schedule 1, Part 2(11)(2) NNUH and the SEND schools have an obligation to enact its 'protective function' and this may, in some instances, override the subjects right to object.
Right to access and correct	You have the right to access any identifiable data that is being shared and have any inaccuracies corrected.
Right to Complain	You have the right to complain to the Information Commissioner's Office, you can use this link https://ico.org.uk/global/contact-us/ or call their helpline Tel: 0303 123 1113 (local rate) or 01625 545 745 (national rate).

Data Protection Officer contact details	Vimmi Lutchmeah-Beeharry, Head of Information Governance, Digital Health, Level 4, 20 Rouen Road, Norfolk & Norwich University Hospital, NR1 1QQ. Info.gov@nnuh.nhs.uk . Add to the respective schools DPO contact details.
