

School: Holt Primary School **Date:** 10/11/2021

Report: Remote consultation

DPE: Stuart Lee **School member:** Louise Whitmore

Consultation details

As there was an overlap from the summer consultation the focus for the session was to have a general DPE GDPR catchup to discuss general routines, latest data protection news, risks and to offer support if needed. The school has been proactive in updating GDPR policy/documentation since the summer consultation and has a dedicated GDPR section on the school website with the main compliance documents list. The main discussions from the consultation are detailed below:

1. DPE website/best practice including: staffing changes and training
2. Review previous report and compliance (documents)
3. Third party due diligence
4. Record of processing (RoP) update and next steps
5. Q and As

1. DPE website/best practice including staffing changes and training

Actions:

- Set up new staff on the DPE website: DPE dashboard>users>add staff, either manually or bulk import.
- Follow up with staff yet to complete the DPE NCSC stay safe online training and GDPR refresh.
- SL to follow up with JE adding the link for the relevant course from the course enrollment report email - **actioned and will be in a future update.**

2. Compliance actions and documents

As above the school has all of the main compliance documents listed on the GDPR/data protection section of the schools website. The third party appendix is listed in the GDPR policy with a link to each provider's privacy statement.

Note: Not discussed during the session - Lousie to check the status of the publication scheme.

3. Third party/supplier due diligence

Discussed with Lousie the importance of checking third party data sharing agreements. Good practice was already evident; all third parties listed as an appendix within the privacy policy; Louise is aware and will check what information is shared. Discussed WANDE and information they have access to. SL to discuss with the compliance team regarding a due diligence form being returned to DPE from the supplier. SL explained that a BP area will be live shortly to support schools with due diligence checks of suppliers.

4. Record of Processing (RoP) - and DPE methodology

Mapped across ROPs for Safeguarding and went through a RoP for moving to CPOMS. The school is considering moving to electronic Safeguarding although in the meantime, Lousie will have a look at the RoP for Safeguarding using current paper systems. Lousie to email SL if more support is needed.

5. Q and As

Q: Is the .gov.uk email secure as the school receives EHCPs from educational psychiatrists this way?

SL to follow up - **actioned. Yes.** If configured correctly (using TLS) it is encrypted in transit but will also depend on the recipient's email configuration. Even if encrypted in transit (stopping eavesdropping in transit as it passes through an email server), it does not mitigate the risk that the sender could potentially send to the incorrect recipient (school). The only way for the sender to remove that risk would be to encrypt the attachment.
