

**Organisation:** The Wensum Trust

**Date:** 01/12/2021

**Report:** Record of Processing - Online Meeting

**DPE:** Linda Mortimer

**School members:** Kathryn Wright, HR Manager

### Consultation details

- Overview of the organisation's requirement to comply with Article 30 of the GDPR
- How personal information is mapped using DPE's RoP tool
- Example of a generic RoP
- Demonstration of the master lists, including roles, IT hardware and software
- Reporting functions of the RoP
- DPE online workshops
- Q and As

An overview of the RoP was provided with an explanation of the organisation's requirements to comply with Article 30 of the GDPR.

A demonstration was given on how the RoP tool can be used to help with business continuity, risk management and accessing a retention schedule that is fully compliant with the IRMS toolkit.

In completing the records in the RoP theTrust will be able to demonstrate its compliance with the GDPR, detailing technical measures as well as the policies and procedures that are in place to ensure the safeguarding of personal information processed by the Trust.

### Reporting Functions of the RoP

These were demonstrated to Kathryn at the time of the meeting on the 1.12.21 and included details of how to produce a Retention Schedule. The Retention Schedule is accessed by going to the main Dashboard / select My Activities / go to Generated Documents.

Also at the time of this meeting Kathryn was shown how to produce individual risk reports which can be generated for each task recorded in the RoP. This can be achieved by going to the 'select document ' (box at the side of each RoP), and then selecting 'process risk report'.

An overview was also provided regarding how the RoP tool is being developed and schools will be able to eventually produce reports showing roles and responsibilities in relation to the specific tasks included in the RoP.

## Record of Processing (RoP) - methodology and where we are at

We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice.

**Step 1** - a general introduction to the RoP tool with a brief overview of the generic process relating to HR management in the Trust – this was completed at the time of the meeting on 1.12.21.

**Step 2**- a more in depth look at the RoP with key process owners and how completing the master lists will ensure the Trust reflects the technical measures and procedures it has in place to safeguard personal data.

**Step 3** – online workshops and group sessions to support schools with further individual sessions as needed.

## RoP - Progress to date

At the time of this meeting, the following RoP was reviewed, amended and tailored to reflect the actual practice at the Trust

- HR01              Pre-employment Checks

## Next Steps

Using a risk-based approach a number of generic RoPs have been copied into the Trusts' RoP area on Knowledge Bank. Kathryn confirmed that she feels confident to complete the tailoring of these RoPs.

If Kathryn has any queries regarding log in details to the site, she may have to refer to Chris Everard, who is an administrator for the website.

Kathryn can always email me if she encounters problems accessing the website and I will arrange for access.
