

School: Mulbarton Primary School

Date: 08/12/2021

Report: Onsite consultation

DPE: Stuart Lee **School member:** Bev Theobald

Consultation details

1. DPE website/best practice including: staffing changes and updating on the DPE website
2. Compliance (documents) and checklists
3. Review of training and information security
4. Electronic internal audit (making the rounds)
5. Record of processing (RoP) update and next steps
6. Q and As

1. DPE website/best practice including staffing changes

- Staff leavers were removed from staff lists during the visit. Beth to check current staff and set up new staff on the DPE website: DPE dashboard>users>add staff, either manually or bulk import. Kalina at DPE (client support) is here to help you and can be contacted for support at: kalina.voyvodova@dataprotection.education.
- Add as part of the induction process for new staff to be set up on the DPE website and to complete GDPR training.

2. Compliance checklist and documents

- SL to send the latest **DPE Privacy Notices and Policy with academy information removed**. In addition, Bev to update the documentation on the school website. SL to also send a supplier/third party masterlist to check against - attached.
- **Work away from school policy - if not already it is good practice to have one.**
- **Publication scheme:** The school has a FOI policy and this is displayed on the school website. To complement this the school can adopt DPE's publication scheme. **The updated guidance can be obtained** from:

<https://dataprotection.education/news-top/news/83-best-practice-updates/182-model-publication-scheme-amendments-improvements-and-updates>

Updated publication schemes can be obtained from:

<https://kb.dataprotection.education/index.php/best-practice-library/best-practice/freedom-of-information>

Please check you are happy that you now have all of the initial compliance documents i.e. **SAR procedure and data breach procedure**. Do all staff understand your organisation's data breach procedure? Review the DPE consent guidance and consent forms; does data displayed around school and on the website correlate with your current documentation? Is there data still displayed of leavers? Beth confirmed that the school sends updated consent forms for specific events i.e. Nativity Plays.

Example of key documents that would be displayed on the GDPR section of the school website:

- GDPR policy
- General privacy notice
- Workforce privacy notice
- Pupil/parent privacy notice
- Child friendly privacy notice
- SAR and data breach procedure
- FOI and publication scheme

Note: the school also has the records management and password policy displayed on the GDPR section of the school website .

3. Review of training and information security

- The school has completed various e-learning modules. Beth will review additional training modules to be completed by staff (including MSAs) and follow up with staff yet to complete any e-learning training. Beth will probably use an INSET to complete a whole school online session and then update the training log via: My Activities: Certificates. Beth to contact Kalina if she would like support with the process.
- As there have been some security concerns within the sector consider staff completing the DPE NCSC stay safe online training at some point.
- Consider adding GDPR training as part of the induction process for new staff.

Note: The school uses SAIT for IT support and also has support via their site manager (Mark). Senior leaders and IT have 2 factor authentication for school devices.

4. Electronic internal audit (making the rounds)

- Demonstrated and draft saved during the consultation. Beth will consider completing the walk with a governor.

5. Record of Processing (RoP) - and DPE methodology

We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice. At present the RoP generic processes have been mapped across and previous RoP demonstrations/presentations have been completed with the cluster. Agreed to review for the next consultation.

6. Data retention

Discussed methods for completing a data cleanse of electronic systems:

- Website - build in routines to periodically check and remove leavers.
- MIS - Pupil asset - Beth to check permissions on archived records to ensure permissions are set correctly to limit access.
- Electronic folders - build in routines for staff to self regulate and complete periodic cleansing of their own folders.

Note: The IRMS retention schedule should be used as a reference.
