

Organisation: The Wensum Trust

Date: 14/12/2021

Report: Record of Processing - Online Meeting

DPE: Linda Mortimer

Trust members: Neil Aylott, Finance Manager

Consultation details

- Overview of the organisation's requirement to comply with Article 30 of the GDPR
- How personal information is mapped using DPE's RoP tool
- Example of a generic finance RoP
- Demonstration of the master lists, including roles, IT hardware and software
- Reporting functions of the RoP
- How financial management is shared across the Trust

An explanation was provided regarding a Data Controller's responsibilities under Article 30 of the GDPR. Article 30 states that Data Controllers must map how they safeguard personal data ie the category of data being processed, the source of the data, how it is received, who it is shared with, who also has access as a third party and the designation of that third party, how it is retained and when it is securely disposed of.

This is known as a Record of Processing (RoP) and also needs to detail the Trust's technical and organisational measures, so in other words the policies and procedures that are in place to safeguard the data.

The RoP also notes the Lawful Basis for the processing of personal data and the Data Subject's rights. This information is completed by the DPE team.

In completing the RoP the Trust will be able to demonstrate its compliance with the GDPR, working in accordance with its own policies and procedures as well as government guidelines as noted in the Academies Financial Handbook, Accounts Direction and other key policies.

Reporting Functions of the RoP

These were demonstrated to Neil at the time of the meeting on the 14.12.21 and included details of how to access a Retention Schedule. The Retention Schedule is produced by accessing the main Dashboard / select My Activities / go to Generated Documents.

Also at the time of this meeting, Neil was shown how to produce individual risk reports which can be generated for each task recorded in the RoP. This can be achieved by going to the 'select document ' (box at the side of each RoP), and then selecting 'process risk report'. This information can be copied into a Word document.

Financial Management across the Trust

LM has worked with Emma in the Central Service Team and mapped out finance RoPs relevant at a Trust level. Work has also been completed with Michelle at Firside and covers relevant RoPs for Firside and Kinsale Junior. Work is continuing with Gemma and this covers RoPs relevant to Burnham Market Primary and Wells Primary.

Next Steps – to identify key personnel with financial responsibility at the three high schools within the Trust and roll out the RoP

Acle High School
Alderman Peel High School
Hellesdon High School

Identify other staff responsible for financial management in the remaining primary schools:

Arden Grove
Heather Avenue
Lodge Lane
Garrick Green

Neil provided LM with this information and a roll out plan will be discussed at the time of the next meeting in February 2022.

Record of Processing (RoP) - methodology and where we are at

We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice.

Step 1 - a general introduction to the RoP tool with a brief overview of the generic process relating to HR management in the Trust – this was completed at the time of the meeting on 14.12.21.

Step 2 - a more in depth look at the RoP with key process owners and how completing the master lists will ensure the Trust reflects the technical measures and procedures it has in place to safeguard personal data.

Step 3 – online workshops and group sessions to support schools with further individual sessions as needed.

Next Steps

Using a risk-based approach a number of generic RoPs have been copied into the Trusts' RoP area on Knowledge Bank.
