

School: Falcon Junior **Date:** 01/12/2021

Report: Onsite consultation

DPE: Stuart Lee **School member:** Edd Savage

Consultation details

1. DPE website/best practice including: staffing changes and updating on the DPE website
2. Compliance (documents) and checklists
3. Review of training, new staff and information security
4. Information security - best practice area, e-learning training and cyber essentials
5. Electronic internal audit (making the rounds)
6. Record of processing (RoP) update and next steps
7. Other: Data retention, Google nsix leaver access and passwords

Consultation discussion details:

1. DPE website/best practice including staffing changes

- Demonstrated the process for setting up new staff on the DPE website and deleting leavers: DPE dashboard>users>add staff, either manually or bulk import. If further support is required, Kalina at DPE (client support) is here to help you and can be contacted for support at: kalina.voyvodova@dataprotection.education.

2. Compliance checklist and documents

Privacy Policy and Privacy notices have been updated to the latest version and uploaded on to the GDPR section of the school website.

- Edd to check that he is happy that the school has all of the initial compliance documents i.e. **SAR procedure and data breach procedure**. Do all staff understand your organisation's data breach procedure? Review the DPE consent guidance and consent forms; does data displayed around school and on the website correlate with your current documentation? Is there data still displayed of leavers?

Actions:

1. Add the SAR and data breach procedure to the GDPR section of the school website.
2. Add a copy of the general privacy notice to the visitor foyer near to the signing in system.
3. **Work away from school policy - if not already it is good practice to have one.** School to ascertain which staff work from home, what data they access and how data is handled, which will support risk management for working out of school (policy available from the compliance best practice area).
4. **Publication scheme:** Discussed the reason for a publication scheme and FOI policy. **The updated guidance can be obtained from:** <https://dataprotection.education/news-top/news/83-best-practice-updates/182-model-publication-scheme-amendments-improvements-and-updates>

Updated publication schemes can be obtained from:

<https://kb.dataprotection.education/index.php/best-practice-library/best-practice/freedom-of-information>

Note: The school is in the process of rolling out a password policy and has a records retention policy.

3. Review of training, setting up new staff and information security

Actions:

- Review additional training modules to be completed by staff (Work away from school and NCSC etc).
- Add as part of the induction process for new staff, staff completing GDPR e-learning training.
- As there have been some security concerns within the sector, consider staff completing the DPE NCSC stay safe online training.

Additional information security resources for schools are available from the NCSC website:
<https://www.ncsc.gov.uk/information/resources-for-schools>

5. Electronic internal audit (making the rounds)

The school has the option to complete their own end of day walk and report findings back to staff (raising awareness). The making the rounds audit walk is available from: DPE website>my activities>making the rounds - add log and complete. Demonstrated during the consultation.

Note: Edd mentioned it would be useful to add voice recordings to the walk log. SL followed up with JE as a possible development - 01/12/21.

6. Record of Processing (RoP) - and DPE methodology

A brief demonstration of generic processes (financial management) and risk reports was completed. To enable the school to tailor for their individual setting, an option discussed is to work with the SBM to support populating the RoP for the school. This will also be beneficial for business continuity.

7. Data retention , CLOUD and restricting Google access for nsix email leavers

Discussed methods for completing a data cleanse of electronic systems:

- Website - build in routines to periodically check and remove leavers.
- MIS - bulk deletion routines and archiving of data.
- Cloud/electronic folders - build in routines/procedures for staff to self regulate and complete periodic cleansing of their own folders, including emails.

Note: The IRMS retention schedule should be used as a reference.

- Google access for staff/students with nsix emails who leave the school but still use the organisational nsix email. SL escalated to JE and ICT Shared Services were liaising with the school and issuing guidance.
- Edd confirmed the school is in the process of adopting DPEs Password Policy. The headteachers laptop is encrypted with Bitlocker. Discussed having a really strong password, or even consider a password manager due to the amount of passwords required. Edd to review data stored on the headteacher's laptop.
