

Organisation: Arden Grove Infant & Nursery

Date: 07/03/2022

Report: Record of Processing - Online Meeting

DPE: Linda Mortimer

Trust members:

Lucy Jermy, School Secretary (Finance)

Clare Riding, School Secretary (HR)

Consultation details

- Overview of the organisation's requirement to comply with Article 30 of the GDPR
- How personal information is mapped using DPE's RoP tool
- Example of generic finance & HR RoPs
- Reporting functions of the RoP
- How financial and HR management are devolved to local level

An explanation was provided regarding a Data Controller's responsibilities under Article 30 of the GDPR. Article 30 states that Data Controllers must map how they safeguard personal data ie the category of data being processed, the source of the data, how it is received, who it is shared with, who also has access as a third party and the designation of that third party, how it is retained and when it is securely disposed of.

This is known as a Record of Processing (RoP) and also needs to detail the school's technical and organisational measures, so in other words the policies and procedures that are in place to safeguard the data.

The RoP also notes the Lawful Basis for the processing of personal data and the Data Subject's rights. This information is completed by the DPE team.

In completing the RoP the school will be able to demonstrate its compliance with the GDPR, working in accordance with its own policies and procedures as well as government guidelines as noted in the Academies Financial Handbook, Accounts Direction and other key policies.

Reporting Functions of the RoP

At the time of this meeting, Clare and Lucy were shown how to produce individual risk reports which can be generated for each task recorded in the RoP. This can be achieved by going to the 'select document ' (box at the side of each RoP), and then selecting 'process risk report'. This information can be copied into a Word document.

A Retention Schedule is also available and can be produced by accessing the main Dashboard / select My Activities / go to Generated Documents.

Financial & HR Management across the Trust

LM has worked with the Central Service Team and mapped out finance and HR RoPs relevant at a Trust level. Key personnel with financial and HR responsibility have been identified across all the Trust schools and by the end of March all schools will have received a 1:1 session on how to tailor the generic RoPs to accurately reflect their Finance & HR responsibilities at a local level.

Record of Processing (RoP) - methodology and where we are at

We will continue to work with you and demonstrate how the RoP can be adapted to reflect your school's individual practice.

Step 1 - a general introduction to the RoP tool with a brief overview of the generic process relating to Finance and HR management at a local level at Arden Grove – this was completed at the time of the meeting on 07.03.22.

Step 2- a more in depth look at the RoP with key process owners and how completing the master lists will ensure the Trust reflects the technical measures and procedures it has in place to safeguard personal data.

Step 3 – online workshops and group sessions will be available, to support schools with further individual sessions as needed.

Next Steps

Using a risk-based approach a number of generic RoPs have been copied into Arden Grove's RoP area on Knowledge Bank. School staff can work through these generic RoPs to tailor them to reflect the actual processes applied at a local, school level.

Any queries arising from populating these RoPs, can be direct to Linda Mortimer prior to the 31.3.22 or entering a Ticket on Knowledge Bank, if your query is after this date.
