

School: Catton Grove

Date: 12/10/22

Report: Onsite consultation

DPE: Stuart Lee

Staff member: Gayle Caldwell

In addition to an audit walk the following was discussed::

1. Where are you at (review of status)? How we can support you
2. Staff changes - housekeeping
3. Information security
4. Staff training and raising staff awareness
5. Data retention
6. Audit walk

1. Where are you at (review of status)? How we can support you

Part of the focus for the visit was to review CCTV and CCTV documentation. We discussed how we can support you and reviewed policy documentation that was currently available on the school website. We looked at your CCTV information within your GDPR policy and discussed in detail access logs and adopting the **DPE CCTV policy** that is available from DPEs [best practice library](#). We discussed the NCC themed cyber security audit and also reviewed the current consent form and acceptable use documentation where it was ascertained that this would need updating.

Although the documents below are not all statutory to have on your website we discussed for transparency and ease of managing these documents that it is good practice to consider including the following documents within the GDPR section of the schools website:

Website documents:

- GDPR/data protection policy
- Privacy notice(s) for parents, general and workforce
- SAR and data breach procedure
- FOI and publication scheme
- Supplier/third party list

A school that can be checked against for their GDPR layout is **Trowse Primary School**: <https://www.trowseprimaryschool.co.uk/key-information/gdpr>

Note: the publication scheme and FOI policy can be looked at during a future meeting.

Other useful documents to review and check that you have are:

- Work away from school policy
- Information Security/Passwords
- Review of consent documentation.
- Acceptable use and information security policies

Actions/considerations:

1. GC to send SL the current data protection policy and SL to update the wording to the latest policy wording.

2. School to amend the GDPR website layout and add the [latest DPE privacy](#) notices to the school website. Note: SL previously sent to the school.
 3. School to include the third party list as a separate document.
 4. School to rename the SAR information sheet website section and replace it with: [SAR procedure](#) and upload the DPE SAR procedure to this section.
 5. School to create a DATA breach website symbol and upload the [DPE data breach procedure](#).
 6. Consent - school to download and adopt the latest DPE consent guidance and issue the consent form to parents.
 7. CCTV - school to adopt DPEs model [CCTV policy](#) that is referenced in the Data Protection Policy.
- In addition you should communicate the SAR procedure and data breach procedure to staff.

2. Staff changes – housekeeping

You have updated your staff lists on the DPE website.

Actions/considerations:

For new staff if not already, consider including DPE's e-learning GDPR training and Stay Safe Online NCSC as part of the **induction process**.

3. Information security

We discussed the NCC themed cyber security audit in detail and GC confirmed that she had not seen a copy (attached). DPE have a number of resources for information security that will support the process:

[Best Practice Library - Information Security](#)

In addition, you can check out the National Cyber Security Centre website: [ncsc.gov.uk](https://www.ncsc.gov.uk) which has useful resources and tips for schools regarding cyber security:

- **School resources:** <https://www.ncsc.gov.uk/section/education-skills/schools>
- **Governor Qs for schools:**
<https://www.ncsc.gov.uk/information/school-governor-question>

Actions/considerations:

1. If not already completed, staff should complete the [Stay Safe online NCSC training](#). This is not only beneficial for the organisation but also for staff when accessing personal information online i.e. personal banking.
2. School is to go through the NCC themed cyber security audit with their IT provider (Intouch) and also check against the schools current policy/procedural documentation i.e. password management and acceptable use.

Note: School will be attending the November DPE workshops where the audit will also be discussed.

4. Staff training and raising staff awareness

As above, we discussed all staff completing GDPR and Information security training (also recommended in the NCC themed cyber security audit). This is available from the [My Activities](#) Tab of the DPE website:

In addition why not use staff briefings and having a monthly focus i.e. clear desks and locking laptops etc. This is an ideal way to raise awareness and keep staff focused with the latest data protection issues.

5. Data retention

We briefly discussed retention schedules. Further information to support you is detailed below and will form part of the focus for future sessions:

- er of tools to support you with data retention: [IRMS](#) toolkit
- DPE's [record management](#) best practice area
- [DfE](#) Annual review of school records and safe data destruction checklist
- [ICO](#)
- Your third party list within your privacy notice
- Laws and regulations (for example, financial regulations and handbooks and limitations act: <https://www.legislation.gov.uk/ukpga/1980/58> /legislation: <https://www.legislation.gov.uk/ukxi/2021/833/contents/made>)
- [Microsoft retention tools](#)
- [Google retention tools](#)
- [MIS retention tools](#)

6. Audit Walk

An audit walk was completed that included a selection of offices and teaching areas. Full details will be added to the making the rounds app: My Activities>Making the Rounds. This will allow an electronic record to be kept.

A brief summary of the findings is detailed below:

Many desktops/ laptops where staff were not present were left unlocked and had applications open. This included the Headteachers desktop and Safeguarding Leads laptop that had CPOMS open. In general there was limited data on display and folder systems in place. Some class lists contained full names with additional information. The Pre-school had a care plan on the notice board that included a front cover with full name and DoB and the Foundation office had staff sickness records on open display in the in-tray.

Actions/considerations:

1. Remind staff of the importance of using Windows Key + L to lock their laptop/desktop when not in their work area.
2. Display the quick reference guide in key areas of the school.
3. Raise staff awareness regarding what should and should not be left on open display (referring to the guide as appropriate).
4. Complete an additional audit walk later in the Autumn Term to identify improvements to practice.
