

School: Hillside Primary

Date: 02/11/22 - 09.30 AM

Report: Remote consultation

DPE: Stuart Lee

Staff member: Lynsey Boulton

Agenda and discussion items:

1. Staff lists and news/KB updates
2. Compliance documents and support
3. Information security and staff training
4. Data retention and DPE resources
5. Supplier due diligence and record of processing
6. Other

1. Staff lists and news/KB updates

Staff lists and staff emails were previously updated by Lynsey.

The proposed UK data protection and digital information bill was discussed with likely changes, including changes to the record of processing requirements. SL explained that the bill is currently on hold.

News and new features to the DPE website were also demonstrated/discussed; to do lists; assigning staff to courses and the redaction tool.

2. Compliance documents and support

SL reviewed the schools website compliance documents prior to the meeting.

Privacy notices - SL recommended that at some point the school updates to the latest DPE privacy notices. The latest DPE documents are available from the following [DPE best practice area](#).

Policy - As there were no significant changes to the GDPR policy Lynsey will send SL the schools GDPR policy and SL will update with the latest wording.

Publication scheme - the school has a publication scheme that is displayed on the schools website. DPE recently updated the publication scheme and SL recommended that the schools scheme can be updated at some point in the future. The current publication scheme is fine how it is at the moment.

3. Information security and staff training

Lynsey had not had sight of the NCC themed cyber security audit (Summer 2022) that was circulated to schools. Lynsey will check with the headteacher and if recommendations had not been actioned, ask the schools IT provider to go through and rag rate and/or produce an action plan as appropriate. The school can also make use of the NCSC website for resources: <https://www.ncsc.gov.uk/section/education-skills/schools>

There is also an [information security best practice](#) area that Lynsey was signposted to with policy documentation, links to other related best practice areas (passwords) and lots of content regarding latest threats in the sector.

Other useful documents to review and check that you have linked to information security are:

- Work away from school policy
- Information Security/Passwords

Staff training - The school had already completed GDPR and cyber security training.

4. Data retention

SL signposted Lynsey to the [records management best practice area](#) and the DfE checklist; that can be used as a working document to support data retention.

5. Supplier due diligence

SL discussed the ongoing compliance project that the compliance team is undertaking to assess third party suppliers. This links with the record of processing and DPE supplier software on the DPE dashboard. SL signposted Lynsey to the Due Diligence best practice area where the Due Diligence form is available. SL suggested that the school email the dpo@ email for any new suppliers the school may use to check against any suppliers that DPE have already assessed.

6. Other

CPOMS

The school has recently introduced CPOMS. SL went through risks i.e. interactive boards being in view of students when CPOMS is being accessed,, working at home; locking laptops and suggested that the record of processing can always be used for a risk assessment prior to implementing in such instances.

Received breach

The school raise ticket: 86087 - received breach - 12th September 2022. The school had not received a reply from DPE. SL reviewed the log and as this was a received breach confirmed that the response Lynsey gave to Norfolk Constabulary to be correct. SL followed up with Victoria (compliance team) who subsequently replied and confirmed the above.
