Making the rounds – Building and Visitor Information

Are all site entrances secure? Yes

Are entrances left unlocked and unsupervised?

No

Observations

Small gate is locked on both sides. Double locked

Building bottom spacer

Is the visitor sign-in system:

Electronic

Is the staff /pupil sign-in system:

Electronic

Is visitor sign-in information secure and not available to others?

Are visitors asked for their ID?

Where required

Are visitors asked for a DBS certificate? Where required

Is visitor information limited to what is required?

Yes

Is there a privacy statement to inform visitors what you do with their data?

No

Does it include track and trace information?

No

Observations

Supply teachers? Privacy statement was not on electronic system

Making the rounds – Locations and Observations

Location and observations:

Location

Admin office

Is there personal information on display?

No

Are any of these types of data visible or easily accessible?

Admin files

Full names

HR or finance files

Student files

Is the room secure / locked?

No

Are any computers unlocked?

No

Do unlocked computers have applications open?

n/a

Is there adequate secure storage?

Yes

Are les kept securely?

Yes

Are photocopiers and printers password protected?

Yes

How is confidential waste treated?

Confidential waste bags

Observations

SBM Office at the back of the office was unlocked. Medical information was on the door to the cabinet. The medicine cupboard was not locked
Photocopier pin Confidential waste bag was open by the photocopier. Registers in cupboard unlocked, at the end of the day they are moved to the confidential waste bag opposite the cupboard Pupil les ling cabinet locked at end of day but unlocked during the day

Severity

Observations

ICT Room was unlocked, door propped open. Server room was locked - positive observation A computer was on but locked, room was empty. Door is propped open Locked server cupboard Chrome books locked

Severity

Medium

DPO Feedback

Front Reception – advise removing the pigeon holes/trays to more secure location. Staff personal information i.e. illness/reason for absence should either be in a sealed envelope or preferably available online via passworded/secure access.

Admin Office – advise locking the SBM office when vacant. Advise locking medicines in cabinet as per the DfE advice. Confidential waste bags should be locked away. Headteacher's office – all observations positive but more information around CCTV required. Need to consider: CCTV retention, accessing the information, CCTV policy. Any request to view CCTV should be treated as a SAR. Usual retention is 30 days - what is the current retention period? You asked about supply teacher and contractors and their DBS information. We would advise that you are able to view the DBS information yourselves. If they are regular visitors to the school their information could be added to the single central register.

IT/Server Room – door was propped open so advise keeping locked. Senco Office – could not enter the room, but would advise checking the contents of the folders on the shelf and possibly keeping in a locked cupboard depending on the contents Extended Services (room 2) - Folder with completed application forms with personal information and details of pupils that have left. Would recommend destroying what is not needed and locking away any relevant current application forms (or keep in electronic form).

Ladybirds class – the teacher had not locked her computer so would recommend raising awareness of doing this across the school (classroom was empty). There were photos of children in the cloakroom area with their names. Teacher advised this was to allow children to understand the faces and names of other children in the class and for parents to know who to invite to parties. We would advise not having this in an area that can be seen by other parents, or not having it at all.

Staffroom – There was a detailed description and photo of every child with behavioural needs and what those needs were. There were also details of parental contact information. I was advised this was so that the whole school would have a consistent behaviour approach. This approach is passive, the information is in an area where other non-teaching staff and possibly non-school employed people would have access. The information is very personal, private and sensitive and is something that should be on a need to know basis. There are other more secure and private methods to deliver this knowledge and information that would ensure that it gets to the right person. We would recommend that this information is not displayed on the wall. The wall also included photos of children with autism and allergy information. We would advise that the staff room wall is not the appropriate place for this information. Please consider what lawful basis there is for displaying this information? The information is special category information (sensitive information). Would ask if there is a real need for staff pigeon holes and whether the information can be sent electronically. Any information in the pigeon holes that is private should be in a sealed envelope or should be handed to the individual.

Middle staffroom – unlocked cabinet with a camera – advise this is kept with other cameras and locked away as may contain photos of children. Two extra pigeon holes of staff from the staff room – in a corridor type room where the information could be accessed. Advise removing. PPA Room – allergy list with children's names on the wall – advise removing. Details of one child and photo – would advise removing.

Classroom – Bumble Bees Year 1. Classroom was empty with a planner left on the desk. Planner contained children's names with details about their reading. Would advise this information is in electronic format. Paper information is easily lost.
