

**School:** Taverham Junior School

**Date:** 28/11/22

**Report:** Remote consultation

**DPE:** Stuart Lee (SL)

**Staff member:** Helen Wells (HW)

Agenda and discussion items:

1. Staff lists and news/KB updates
2. Compliance documents and support
3. Information security and staff training
4. Data retention
5. Supplier due diligence and record of processing
6. Other

### **1. Staff lists and updates**

SL demonstrated updating staff lists and HW will update and amend staff lists for the school: DPE website>users>select and delete or add new users.

The proposed UK data protection and digital information bill was discussed with likely changes, including changes to the record of processing requirements. SL explained that the bill is currently on hold.

News and new features to the DPE website were also demonstrated/discussed; to do lists; assigning staff to courses and the redaction tool.

### **2. Compliance documents**

HW had already updated compliance documents. The school has reduced website documents to DfE recommended documents. The schools data protection compliance documents will be updated at the next document review. The school also has a data breach and SAR procedure that they are happy with that is managed by the headteacher.

The school has the general privacy notice on the school website and issues the student/parent and workforce privacy notices separately.

**Recommendation:** SL recommended the school have a FOI policy/publication scheme. DPE has combined information with what the DfE state should be published with information from the ICO for an amalgamated scheme that can be used. The high level scheme from DPE is the scheme that would be published on the website. The detailed scheme is an internal document that can be used for referencing. Full guidance is available from DPE's [Freedom of Information best practice area](#).

Further information and guidance can also be obtained from the [ICO website](#).

### 3. Information security and staff training

**Information security** - HW confirmed that they have perused the NCC themed cyber security audit, have produced an action plan and have already assigned a governor for information security. HW has asked the schools IT provider to go through and complete the sections relevant to them.

There is also an [information security best practice](#) area that HW was signposted to with policy documentation, links to other related best practice areas (passwords) and lots of content regarding latest threats in the sector.

**Other useful documents to review and check that you have linked to information security are:**

- Work away from school policy
- Information Security/Passwords

**Staff training** - The school have actioned the NCC thematic audit recommendations and have bought in to additional cyber support.

**Recommendation:** The school should review information security and GDPR training and consider staff completing the DPE Stay Safe Online NCSC and GDPR Refresh training as appropriate. This is not only beneficial for the organisation but also for staff when accessing personal information online i.e. personal banking:

<https://dataprotection.education/courses-heading/stay-safe-online-ncsc>

Reminder for assigning staff and sending an email for training:

A quick way to send a staff email to complete the training is: **DPE website>My Activities>My courses**

Once on the page where the courses are showing you can then select the **'Add To- do'** widget on the bottom right hand side of the screen:

This will open up a text box for you to enter, the title, description and completion date. Use the 'assigned to' to open up the email staff list. You can also add a reminder, a week before the completion deadline. The page link is automatically selected, so when staff receive the email it will direct them to the courses page.

### 4. Data retention

SL signposted HW to the [records management best practice area](#) and recommended the DfE checklist; that can be used as a working document to support data retention.

## **5. Supplier due diligence**

SL discussed the ongoing compliance project that the compliance team is undertaking to assess third party suppliers. This links with the record of processing and DPE supplier software on the DPE dashboard. Once developed the school will be able to select their third party suppliers that DPE have vetted.

## **6. Other**

The school will be migrating to Compass Education and will be using CPOMS. SL discussed risks and risk mitigations in addition to data retention and the secure deletion of data from legacy systems. The Record of Processing (RoP) was also mapped across for the MIS migration and the generic report taken from the RoP is attached that can support the risk assessment process for the school. HW can contact DPE if additional support is required.
