

Report: Information sheet to disseminate to the cluster

DPE: Stuart Lee

Staff member: Karen Hurst

Staff lists and updates

School staff lists on the DPE website should be accurate. You can update staff lists and delete leavers by logging in to the DPE website, select users from the dashboard>select staff member and delete. You can add staff by selecting the **add** tab on the same page.

Compliance documents

There have been some updates to compliance documents (GDPR policy and privacy notices). There is no need to take action straight away but at the next document review, you can download and update your compliance documents to DPEs latest version. These can be obtained from the compliance [DPE best practice area](#)

A school to check against compliance layout is:
<https://www.trowseprimaryschool.co.uk/key-information/gdpr>

Third party list: Check that your supplier third party list is up to date and remove suppliers no longer used.

For information: DPE is currently completing a compliance project and assessing third party suppliers. This links with the record of processing and DPE supplier software on the DPE dashboard. In a future development you will be able to select the suppliers you use and any new suppliers from the third party/supplier area of the DPE dashboard.

Information security and staff training

If you have not already done so, ask your IT provider to go through the NCC thematic cyber security audit (MI sheet - sent to schools summer 2022).

As not all schools had a plan in an Excel/google worksheet the findings from the audit have been used to create an audit response plan (attached). The **audit response action plan** is broken down into the same sections as the original NCC audit report and rag rated accordingly using the same rag rating as the original audit. You can easily identify from using the plan areas that are to be the focus. The plan effectively can form a gap analysis to highlight actions and a method of assessing what is in place and what is being met and, if not, what steps will be taken to meet the audit finding recommendation.

Making best use of DPE's resources for plan completion

In the example plan you can identify where DPE resources can support you in completing the plan, whether this is using the DPE breach log to record information security incidents, DPE's Stay Safe Online NCSC/GDPR training, or the many DPE best practice areas and policy documentation, including:

- Information security
- Acceptable use and BYOD
- Passwords
- Records management

A suggested way to complete the plan is:

1. Assign a governor for cyber security (share the plan) and add as a regular item at governor meetings
2. Share with your IT provider and ask them to complete the sections relevant to them
3. Ensure staff have completed cyber/information security training
4. Go through the remainder of the plan and complete and identify gaps and actions to be completed
5. Regularly review status and follow up as appropriate

In addition to the DPE resources, if you have a query please email:
dpo@dataprotection.education for a member of the team to support you.

Schools can also make use of the NCSC website for resources:
<https://www.ncsc.gov.uk/section/education-skills/schools>

Other useful documents to review and check that you have linked to information security are:

- Work away from school policy
- Information Security/Passwords

Staff training - Follow up with staff yet to complete **GDPR refresh** (if it has been more than 2 years since training was completed) **and the Stay Safe Online NCSC training**. This is not only beneficial for the organisation but also for staff when accessing personal information online i.e. personal banking:

<https://dataprotection.education/courses-heading/stay-safe-online-ncsc>

Note: why not add data protection and information security training as part of the induction process for new staff as you set them up on the DPE system?

Data retention

If you have not got a data retention schedule check out the [records management best practice area](#) Either the IRMS or the DfE checklist can be used as a working document to support data retention in school.

Audit walks

In addition to DPE visits, you can make use of DPEs Making the Rounds app to complete your own audit walks. You can access the Making the Rounds app via: My Activities> Making the Rounds. In addition you can continue to raise awareness by using the attached quick reference sheet and also display this in school.
