Bcc: Tammy Buchanan <tammy.buchanan@dataprotection.education>

Hi Nick,

Thanks for your time yesterday and for showing me around the school. I have put some notes together about our meeting for both our information:

- Late arrivals students in the Reception area - would advise moving this to a more private area as the book is in a public area and could be removed.
- We discussed a letter and an email you had received that both requested student information that didn't feel necessary. For the Prince's Trust request, you were going to go back and check why they had requested the additional special category data and check the data sharing agreement in place. For the Royal Holloway letter you were going to ignore as this seemed to be a data gathering exercise and we were both unclear about how genuine the letter was.
- We discussed the ticket you had raised about a non photograph child's photo being uploaded to the Rise website. You have already ensured that the photo has been removed, spoken to the person that had uploaded it and advised the parent. I did advise checking what the photo agreement is with the parent as some parents do not give consent for their child's photo to be taken at all, not even for internal purposes. We discussed the parent's objection to the website having its address and photos of other children and agreed that this is not an issue.
- You explained that a new manager is starting in the new year who will help with the data protection, and you hope to have all the GDPR champions up to speed with their help - if you need for any of them to have a demo of the Knowledgebank, please let me know and I will arrange it for you as we have someone that specifically does that.
- You want to focus on three areas for staff next term:
 - Clean desks - there is a whole section in the Best Practice area for this: <https://dataprotection.education/index.php/best-practice-library/best-practice/clear-desk> as well as a learning nugget in the Courses area: <https://dataprotection.education/courses-heading/clear-desk>
 - Locking doors - there is a physical security learning nugget which may be useful for this: <https://dataprotection.education/courses-heading/physical-security>
 - Locking computers - I advised that staff should not rely on the auto lockout but learn to lock their computers when they leave the room - there is a drip feed poster which may help: <https://dataprotection.education/best-practice-library/documents/drip-feeds/19-leave-it-lock-it-computer>
- This reference guide is also useful as it covers a number of areas: <https://dataprotection.education/best-practice-library/documents/drip-feeds/57-dpe-quick-reference-guide>

If you would like to book in the next online session please use the link below to check my availability and book a date and a time that is convenient for you:
