To: Jo Staveley <jo.staveley@bilingualprimaryschool.org.uk>

Bcc: Tammy Buchanan <tammy.buchanan@dataprotection.education>

Hi Jo,

Thank you for your time today. It was really good to meet you. Please find below some of what we discussed and any actions:

- **Staff on Knowledgebank** - you advised that staff receive their data protection training from yourself in September so are not currently on the Knowledgebank. There are additional training courses and nuggets of information that may be useful to staff on the Knowledgebank. This would be difficult for Bilingual Primary at the moment as there is not someone to administer this. It is often useful to have a member from SLT and an administrator to help with data protection. Data protection training should be part of the onboarding process.

- **Policies & Supplier due diligence** - BPS use the template from Brighton & Hove for the data protection policy which is up to date along with the privacy notices. At the end of the pupil privacy notice there is a third party supplier list which I will add on to the Knowledgebank as part of DPE's current due diligence work with third-parties. We will discuss ROP at our next meeting in March.

- **Cyber Security** - we discussed Cyber security and I advised that some insurances require staff to complete the NCSC training. They also provide a set of questions that might be useful for governors:

- School resources: <https://www.ncsc.gov.uk/section/education-skills/schools>
- Governor Qs for schools: <https://www.ncsc.gov.uk/information/school-governor-questions>

- **Information Security** - we discussed information security at BPS and it sounds good. Most data is held in cloud systems which leaves human error as a possible weakness, so advised good staff training and reminders.

- **Cyber Security** - I advised of recent cyber security incidents in schools in the UK and the dramatic rise where education is the target (I am currently writing a Knowledgebank article on this which I will publish shortly). Advised to ensure good backups (three are recommended with at least one off site) and good password security with strong passwords. We discussed the use of a password manager and think the advice of your IT team to use phones with biometric/6 PIN codes is a good one for storing passwords, although there are other good password managers available. It also relies on staff not minding to use work passwords on their personal phones (which they may need available during class time) and having the recommended biometrics/6 PIN phone. BPS uses multi factor authentication which is a good cyber security step. PIN codes are also used for printers.

- **Data Retention** - BPS data retention sounds good, although suggested looking into data retention around emails, particularly in the sent and deleted folders going forward. Some members of staff often never delete emails.

If you have an additional supplier list on the end of your workforce privacy notice, please feel free to send that through to me and I will have a look at adding it into the Knowledgebank.

I will shortly send you the meeting request for March where we agreed to talk about Record of Processing. In the meantime, if you have any questions or need help with the walk around you are planning, then please do not hesitate to contact me.

Many thanks,

Tammy Buchanan
