To: Lisa Collington <lisacollington@balfour.brighton-hove.sch.uk>

Bcc: Tammy Buchanan <tammy.buchanan@dataprotection.education>

Hi Lisa,

Thank you for your time today. It was good to see you again. Please find below the information we discussed:

Data Protection Policy - The Data Protection policy on the school website is an old one but you advised the new one is currently being reviewed. The location of the privacy notices and the Data Protection policy is in an unusual place under the privacy settings of the website. Recommendations are that all policies should be under the 'Policies' section of the website as this is where Ofsted would look and general guidance generally advises this. Some schools choose to have a separate data protection page as well so that the information is readily available. The privacy notices are not like any I have seen before, so please see the link to the DPE template ones here: <https://dataprotection.education/best-practice-library/best-practice/transparency> At the end of the privacy notices is the template table that I mentioned for suppliers/third-parties that you may wish to use.

FOI's - there have been a number of FOI's this week. Guidance on how to answer them can be found here: <https://dataprotection.education/news-top/news> Further FOI advice can be found here: <https://dataprotection.education/index.php/best-practice-library/best-practice/freedom-of-information>

Training - you advised that all staff had training at the start of term and that training is part of the onboarding process.

Governors & NCSC - it is worth checking if there is a governor who oversees data protection in the school The National Cyber Security Centre advises that Governors are able to answer the following questions: <https://www.ncsc.gov.uk/information/school-governor-questions> Being able to answer these questions is a good starting point for Cyber Security and Business Continuity. The NCSC provide a set of resources for schools that you might find useful: <https://www.ncsc.gov.uk/section/education-skills/schools>

Information Security - Balfour uses Brighton & Hove's IT services. USB sticks are not allowed and checked for apart from one computer for visitors onsite for presentations etc. Printing is via a badge and so is very secure. Would advise considering multi factor authentication as this is considered the no 1 tool in the prevention of cyber crime. It is possible to set this up so that it is not checked in school on a school device. Here is a link to the head teacher/USB story I mentioned: <https://iapp.org/news/a/ico-fines-ex-headteacher-for-illegal-upload-of-childrens-data/>

Supplier Information & Due diligence - we discussed reviewing and publishing the supplier (third-party) data sharing list for students, staff and parents. Please feel free to send this through to me once located and I can work on it along with the due diligence work that DPE is doing. Other schools do publish the list and sometimes the shared data on their website for transparency purposes.

I checked through my emails regarding data retention. You sent me a link to the irms data retention schedule rather than a Balfour policy. We recommend using the information held in the irms policy but that organisations have their own records management policy and associated documents: <https://dataprotection.education/best-practice-library/best-practice/records-management>

Further information about the latest cyber attacks on schools, of which there have been several in the UK, can be found in the news section of our website: <https://dataprotection.education/infosec/301-vice-society-ransomware-attacks-on-schools>

We will recap the above at our next meeting and take a look at the checklist. I will shortly send through the next meeting invite.

Have a lovely weekend,

Many thanks,

Tammy Buchanan
Data Protection Consultant

BSc(Hons) Computer Science

ITIL 4 Service Management, NCFE Principles of Cyber Security
