26 January 2023 at 17:03

Hi Carl,

Thank you for your time today. It was good to see you again. Please find below the information we discussed:

Policies -

Pupil privacy notice is complete and on the website
Workforce privacy notice - you are working on this
Data Protection Policy - is mixed with the IT Policy. It is an Ofsted requirement to have a Data Protection Policy, please find the latest template attached. Our Information Security Template is here: <https://dataprotection.education/best-practice-library/documents/information-technology-security/132-information-security-policy>

Supplier Due Diligence -

You have added supplier information to the pupil privacy notice; I can use this information to add to the Knowledgebank under Third Parties. Just to advise that the privacy notice contains a mixture of supplier names and software. When I do this, I will clarify what has been added and the relevant names. When you have worked on the workforce privacy you will also send me the third-parties that staff data is shared with.

SAR -

You advised that you have just received SAR and will add it onto the Knowledgebank

Training -

We discussed training and adding staff onto the Knowledgebank. This link will show you how to assign courses to staff: <https://dataprotection.education/news-top/news/165-using-the-knowledge-bank/291-assigning-users-to-courses>

The ICO advises that staff undertake data protection training at least every two years, with it also being a part of onboarding when staff join. We would advise that staff that have access to additional data or special category data, such as the head and SENCO that they do some of the other courses on the Knowledgebank. Other ways that staff can be trained include putting up posters around the school: <https://dataprotection.education/best-practice-library/documents/drip-feeds>

Data Retention -

We discussed data retention and you advised good practice around IT equipment disposal and shredding of documents, but were not aware of a retention schedule. Please see below further information about data retention:

Organisations can set deadlines, document and justify timeframes they have set for retaining data. There are two key factors: the purpose for processing the data, and any legal or regulatory requirements for retaining it. One of your purposes will need to apply for you to continue to store the data. Data should not be held for longer than is needed. You shouldn't just keep data just in case you may need it in the future.

Different data systems to consider when reviewing data retention:

- Emails
- MIS
- Website
- Network/CLOUD

I would advise looking at the Records Management Best Practice Area on the DPE website:

<https://dataprotection.education/best-practice-library/best-practice/records-management>

If you download the IRMS toolkit document and go to page 37, it will give you a table of schedules based on the document/file type.

Microsoft retention information: <https://learn.microsoft.com/en-us/microsoft-365/compliance/retention?view=o365-worldwide> I would advise checking the retention of emails, particularly in the Send and Deleted folders as sometimes these are never deleted - this can be controlled centrally.

I have already sent you a meeting invite for our next online meeting on March 21st @ 3:30pm

If you have any queries, please do not hesitate to contact me or send an email to dpo@dataprotection.education.

Have a good half term!

Many thanks,

Tammy Buchanan
Data Protection Consultant

BSc(Hons) Computer Science

ITIL 4 Service Management, NCFE Principles of Cyber Security
