Hi Jill,

Yes, of course. I can offer the following dates for an online meeting:

Tuesday 28th February @ 2pm
Monday 6th March @ 2pm
Tuesday 7th March @ 2pm
or any time on Monday 13th March

We would advise undertaking a DPIA given the nature of the camera usage, so would advise looking at this area of the Knowledgebank and then attempting a DPIA:

<https://dataprotection.education/index.php/best-practice-library/best-practice/dpias>

If you could let me know the date and time which suits you best and I will book it in. If none of them suit then please come back to me and I can have another look.

I look forward to hearing from you.

Many thanks,
Tammy

Morning Tammy

I wonder if you can help us? I refer to the email below from our Head of PE. Is it possible to set up a meeting with him regarding this, in order for us all to be clear as to what we can and can't do regarding using the camera? We have for now advised him not to use this until we get some clearer guidance. If you could please come back to me at some point to arrange a convenient time to discuss that would be much appreciated.

Kind regards

Jill

Afternoon all,

I have got out this week and used our new VEO camera for the first time. The camera gets set up, we record the game, upload to the VEO clouds..... and it comes back having followed the ball with the game broken down into highlights.

Having met with Mr Hood earlier I'd like to start an email chain to discover what I can or can't use this technology for. Below are a list of things we could do to get the most out of it.

I'm fully aware of my own ignorance regarding any GDPR, safeguarding and Data Protection issues that this technology produces. So if any relevant colleagues can highlight and enlighten me as to the issues with any of the uses below (with hopefully any solutions or work around's) that would be very much appreciated. I'm hoping having spent over £1000 on this that we can get as much use out of it as possible.

I'd like to go on record by saying how confident I am that if used properly we can further raise the profile of the School and in particular the facilities, provision and success of our students. This will lead to even more success, improved cohorts of students, improved behaviour and academic success.

Internal A-Level Non-Examined Assessment footage:

-Main purpose of buying this was to film 6th form football/netball games to grade them for the practical part of the course (the quality is significantly better than camera and tripod). This needs to be in full competition so would be against other schools. This would only be used internally for grading and sending to moderators.

Internal sharing of Darrick Wood Sport:

Second use could be to film across more sports and more year groups to share highlights of students success in assemblies, sports awards evenings. This would include footage of students from other schools.

Internal sharing to wider community:

Sharing sporting highlights at Open Evenings, Year 7 parent information evenings (events) and on our school website. This use is to share success with wider Darrick Wood Community (parents/friends) for the purpose of attracting interest and showing off facilities and provision the school can offer.

Sporting analysis:

Students can be given invitation links to sign up as a DWS VEO member. Here they can watch themselves playing for the purpose of analysing their own performance. This would be in an effort to improve performance and bring the school more sporting success. Self analysis could also benefit students trying to raise their own performance for a GCSE or A-level grade. ***This is where I'm now aware we would need a school/student/parent agreement and contract regarding the use and sharing of footage obtained from VEO*** I am able to determine 'roles' amongst any member of our VEO community. I am currently the admin/coach and students can be limited to players/viewers. But I believe they can still download highlights to their own devices and of course screen record their own phone whilst watching.

Sharing externally amongst wider community:

I'm not as worried about this use....but there is the possibility then that highlights can be shared on forms of social media (Twitter/Instagram etc). This will again raise the profile of sport at Darrick Wood and improve our reputation, intake and future academic and sporting success. Whilst I appreciate this use likely comes with the most issues.

Please do let me know your thoughts on this and what barriers I have not considered and how we can potentially overcome them. At the very least I will continue using for A-level and GCSE footage gathering both here and at other schools (whilst gaining permission of the opposition via email). As this would be no different from many years gone by worth of filming via camera and tripod.

Many thanks in advance
