Hi Karen,

Thank you for sending these through. Please can I clarify the use of personal email addresses for those staff? Some of the staff, even teaching assistants, have personal email addresses next to the name - are these the email addresses that the school use to communicate with them about school business? If this is the case, there is a data breach risk involved and something I should discuss further with Matthew (have copied him in). While our system does allow any kind of email address I do need to advise you that in adding staff onto the KB you are then likely to send them training courses to do- these would then go to their personal email address. Would you be expecting them to login to school systems with their personal email address to do these courses? It does also potentially mean that one of those staff could logon to the Knowledgebank with a personal email address and add a data breach which could contain a third person's personal data.

I do find often schools do not issue email addresses for midday supervisors and cleaners and in those situations it would be unlikely they would logon to the Knowledgebank for training, but would have a group training session run by a data protection lead in the school as they often don't have access to school devices either.

I will wait to hear from you or Matthew before adding staff onto the system.

Many thanks,
Tammy

Hi Tammy,

As promised - please find attached. As you will see we have one email address missing but she does not appear to have one on the system.

If there is anything else you need - please do let me know.

Kindest regards

Karen Millard

Hi Karen,

That's great thanks for letting me know. I have attached the csv template just in case you don't have it. If you can also advise those staff when you send it through to me because as soon as I add them they will receive login credentials which may go into spam/junk.

I look forward to hearing from you.

Many thanks,
Tammy

Good morning, Tammy,

I hope this emails finds you well.

Matthew has asked me to send you a list of all staff members, which I am working on, but I am currently waiting for a few email address' to be confirmed - once complete, I will send over to you.

I hope this is ok with you.

Many thanks

Karen Millard

Hi Matthew,

Thanks for your time today. It was good to meet you. Please find below the details we discussed and links with information we discussed:

Commitment to compliance - we didn't discuss this, but it is important that you register Data Protection Education as your DPO as it is a requirement under the UK GDPR. Instructions on how to do this are here: <https://dataprotection.education/best-practice-update/110-make-sure-dpe-is-your-registered-dpo-with-the-ico>

Knowledgebank - advised that all staff can be added to the Knowledgebank. I have attached a .csv file for you to populate and send back to me. Just a reminder to email all staff to let them know that they will receive some login credentials for it. We agreed that you will email me details of any staff that could be admins for the Knowledgebank and I will then arrange for them (and you) to have a demo of the system with my colleague Kalina. Once all staff are on the system you or any other admins will be able to assign courses to them - I will send the instructions through on how to do that when we get to that point.

Compliance Manager - I talked about using the Compliance Manager as a way of assigning documents and policies to staff (not necessarily data protection ones) to read and then you are able to run a report to check whether staff have read them or not. Here is a bit more detail about the Compliance Manager: <https://dataprotection.education/best-practice-update/104-compliance-manager-released>
There is a video on how to use the Compliance Manager which can be accessed by going to the Knowledgebank Dashboard and clicking on the video camera icon next to the Compliance Manager title. However, this will also be covered in any demos with Kalina.

Policies -

Although the documents below are not all statutory to have on your website, for transparency and ease of managing these documents, it is good practice to have a data protection section on your website and consider including the following documents:

Template Privacy Notices can be found here: [Privacy Notices](#)

Website documents:

- [GDPR/data protection policy](#)
- [Privacy notice\(s\)](#)
- [SAR](#) and [data breach procedure](#)
- [FOI and publication scheme](#)
- [Supplier/third party list](#)

Other useful documents to review and check that you have are:

- Work away from school policy
- Information Security/Passwords
- Review of consent documentation. Consent guidance and consent withdrawal can also be added to the GDPR section of the school website

Awareness - this can be raised for staff through the use of posters around the school: <https://dataprotection.education/best-practice-library/documents/drip-feeds>

FOI Info/Advice is here: <https://dataprotection.education/index.php/best-practice-library/best-practice/freedom-of-information>

If you have any questions then please do not hesitate to contact me or email dpo@dataprotection.education.

I will shortly send you through the invite for April 27th, I look forward to seeing you then.

Many thanks,

Tammy Buchanan
