To: Liz Goddard <lizgoddard@stberns.brighton-hove.sch.uk>, Hannah Hooper <hannahhooper@stberns.brighton-hove.sch.uk>

Bcc: Tammy Buchanan <tammy.buchanan@dataprotection.education>

Hi both,

Thank you for your time today. It was good to see you again. Please find below any information discussed and further links:

Data Protection Policy - complete just needs uploading to the website

Knowledge Bank - staff are all on the Knowledge Bank and have either done courses or have courses assigned to them. Advise that adding/removing staff and assigning them courses should be part of the onboarding process

Data Walk (Making the Rounds) - you did your own data walk and felt that generally things were positive. Staff computers were locked and information was generally locked away. We discussed:

- club lists on the wall. Consider whether there is a teaching need for the list to be on the wall or if it is for convenience. This kind of list could be kept in a folder in the drawer. Consider if other things are on the wall in the same room, such as photos of the children which could make the risk higher if the two lists/displays were used together. Identify who is in the room outside of hours and has access to the data.
- SEN lists on the wall. Would always recommend these are not on the wall but in a drawer. Consider who else may have access to the room (parents/pupils) and who else would see the list.

I have attached the Infographic which I said might be helpful for the above and other items from your data walk.

Retention - you are going to look at this further. The Records Management Best Practice Area has more information:

<https://dataprotection.education/best-practice-library/best-practice/records-management>

Information Security - we discussed some information security in relation to access control and data retention.

Further information can be found here: <https://dataprotection.education/index.php/best-practice-library/best-practice/information-security> and I would advise looking at the Checklist tab and going through the information security checklists.

Work with your IT provider to ensure passwords are either complex/two factor authenticated/changed regularly. Here is the school's cyber news story I mentioned: <https://dataprotection.education/infosec/301-vice-society-ransomware-attacks-on-schools> - sharing this news story with staff can help them understand why good password management is important.

Third-party Supplier Due Diligence - this is the next area to work on, start by getting together a list of suppliers that you share parent, pupil, staff and visitor information with. I sent you some resources about this last time with ideas for your list. How to copy the generic third party information to your school in the Knowledge Bank can be found here (it covers everything you need to know about gathering and logging the information): <https://dataprotection.education/best-practice-update/296-due-diligence-step-by-step>

If you have any further questions then please do not hesitate to contact me. I will shortly send through a meeting invite for our meeting in June and look forward to seeing you then.

Many thanks,

Tammy Buchanan
Data Protection Consultant

BSc(Hons) Computer Science

ITIL 4 Service Management, NCFE Principles of Cyber Security
