

School: Wymondham Cluster

Date: 23/04/23

Report: Information sheet to disseminate to the cluster

DPE: Stuart Lee

Staff member: Karen Hurst

Reminders for key contacts and logging SARS/breaches and requests

Any staff member who would like a DPE knowledge bank refresher can email:

kalina.voyvodova@dataprotection.education

For SARS and data breaches/FOIs these should always be logged on the SAR and breach log and a member of the team will get back to you and/or update the log with actions to complete.

As the DPE ticket system is continuously monitored and tickets logged, and because consultants can be in school, or on leave, for urgent data protection queries and queries related to SARS and data breaches please use the DPO@ email:

dpo@dataprotection.education

DPE Keep in the know digest email

DPE is automating sending some of the key information and updates to you. You should all shortly be receiving the latest DPE news via a digest email (Keep in the know! With data protection education). If you have not received an email by the end of April , please email: **dpo@dataprotection.education** with the email address to be used and this will be checked and set up for you.

Ideally the admin user and head teacher should be receiving the digest email. Content will have lots of relevant information, for example: Knowledge bank updates, redaction guidelines and using Whatsapp in schools.

Audit walks Spring term 2023

Physical data protection audits were completed at a number of the cluster schools during Spring term 2023. You can access the Making the Rounds app to view your audit walks via: **My Activities> Making the Rounds>DPO feedback and actions taken tab**. For schools audited, DPO feedback has been completed within the **DPO feedback tab**. Once you have completed your follow up actions, each school can add comments in the **Actions Taken tab** and close the Log.

In addition you can continue to raise awareness by using the [quick reference sheet](#) and also display this in school. For schools that have not had a audit walk completed and would like one, please email: **stuart.lee@dataprotection.education**

Some feedback and reminders from the audit walks:

Visitor sign in: If not already, add the following statement to the electronic sign in/paper sign in systems: *Visitor information is collected for health and safety, record of official visits and safeguarding. If you would like to know more, the general/visitors privacy notice is available on the school website, or you can ask at reception for a paper copy.*

Laptops, desktops and passwords:

Reminder to never write PW and UNs down and leave them on open display in diaries/notebooks.

Always lock your desktop/laptop when not in your work area (even if you have the auto lock timeout activated).

Check with your IT provider that all laptops are encrypted.

Check that all staff iPads/Tablets have secure code entry.

Physical folders:

Check folders in classrooms and offices for outdated information and securely destroy where outdated information remains.

Check online folders and apply the same rules as with physical folders by developing housekeeping routines to remove information of leavers.

Medical files on display

It is noted that at some settings, medical information is on display on walls and back of cupboard doors. Attempts to protect this data from casual observation have been made by covering up specifics and minimising the information. Schools had also assessed risks and parents were aware. Whilst we agree that the information is vitally important, we always recommend a pro-active "informing" approach so that staff who need to know the information, do indeed actually know it. Alternative options of sharing include utilising cloud based solutions and folder systems, rather than having this information displayed on walls/doors.

Cyber and information security to remain the focus

If you have not already done so, ask your IT provider to go through the NCC thematic cyber security audit (MI sheet - sent to schools summer 2022).

As not all schools had a plan in an Excel/google worksheet the findings from the audit have been used to create an audit response plan (previously sent). The **audit response action plan** is broken down into the same sections as the original NCC audit report and rag rated accordingly using the same rag rating as the original audit.

You can easily identify from using the plan areas that are to be the focus. The plan effectively can form a gap analysis to highlight actions and a method of assessing what is in place and what is being met and, if not, what steps will be taken to meet the audit finding recommendation.

DPE has now also produced a checklist that can be used if you have not already started to complete the plan sent out previously. This is available from the information and cyber security best practice area [here](#).

Making best use of DPE's resources for plan completion

In the example plan/checklist you can identify where DPE resources can support you in completing the plan, whether this is using the DPE breach log to record information security incidents, DPE's Stay Safe Online NCSC/GDPR training, or the many DPE best practice areas and policy documentation, including:

- Information security
- Acceptable use and BYOD
- Passwords
- Records management

A suggested way to complete the plan is:

1. Assign a governor for cyber security (share the plan) and add as a regular item at governor meetings
2. Share with your IT provider and ask them to complete the sections relevant to them
3. Ensure staff have completed cyber/information security training
4. Go through the remainder of the plan and complete and identify gaps and actions to be completed
5. Regularly review status and follow up as appropriate

In addition to the DPE resources, if you have a query please email: dpo@dataprotection.education for a member of the team to support you.

Schools can also make use of the NCSC website for resources: <https://www.ncsc.gov.uk/section/education-skills/schools>

End of year routines

Maintaining staff lists

Reminder to maintain school staff lists on the DPE website and add to your end of year routines to remove leavers. You can update staff lists and delete leavers by logging in to the DPE website, select users from the dashboard>select staff member(s) and delete. You can add staff by selecting the **add** tab on the same page.

Consent refresh

Review your current consent with the latest DPE documents to ensure you are happy that documents are up to date. The latest consent documents can be located in the DPE compliance best practice area [here](#).

Third party lists

Check that your supplier third party list is up to date and remove suppliers no longer used. DPE continues to work on completing generic supplier/third party lists and a workshop will be arranged to support you with utilising the system for supplier due diligence. More information can be found [here](#)

Continue to develop a data retention schedule/routines

As you get towards the end of term it is worth reviewing your retention documents and processes for checking and securely destroying data that has reached its retention schedule timeline. If you have not got a data retention schedule check out the [records management best practice area](#) Either the IRMS or the DfE checklist can be used as a working document to support data retention in school. As organisations move more towards Cloud based solutions it is worth reviewing systems and processes in place for ensuring data retention guidelines can be adhered to within your electronic systems.

Staff training and induction for new staff

If it has been more than 2 years since training was completed. Staff should be set up to complete the DPE **GDPR refresh and if not completed already, the Stay Safe Online NCSC training**. It is worth thinking about planning for this now, in line with your school INSET days 2023-24.

GDPR and cyber security training should also form part of the **induction process for new staff**.

You can also check on training completion status and send a **to-do** email to staff to complete training [here](#).

End of term checklist

The following checklist gives support for some key actions that are completed at the end of term for staff and school buildings and is located [here](#).
