To: Liz Goddard <lizgoddard@stberns.brighton-hove.sch.uk>, Hannah Hooper <hannahhooper@stberns.brighton-hove.sch.uk>

Bcc: Tammy Buchanan <tammy.buchanan@dataprotection.education>

Hi both,

Thank you for your time today, it was good to see you both again. Please find below the details we discussed:

Making the Rounds - I explained about an update to Making the Rounds (data walks) that now gives feedback when using the view mode. If you would like to add your previous Making the Rounds that you have done yourself, then please feel free to do so and then let me know and I can add any feedback for you. Go to the 'My Activities' menu and select 'Making the Rounds'. Here is an example view:

Location CCTV	Is there personal information on display? Yes	Are any of these types of data visible or locations and devices easily accessible? Allergy information Behaviour files
CCTV Best Practice Area CCTV should have a defined purpose which should be clearly documented. Retention period should be documented and adhered to. An access log and procedure should also be kept. Any physical box recording footage onsite should be in a locked cabinet with access controls in place. The ICO states that CCTV information should be included in the privacy notices for transparency purposes. If the CCTV points to an external road/pavement it may be necessary to put further signage in that area. A DPIA may be required. Signage is recommended at entrances and in regular places. ICO CCTV Guidance	Guidance: Review DPE Quick Reference Guide	Allergy Information Guidance: Sharing of allergy and dietary information should be done in a confidential way. The ICO states that special category data is personal data that needs more protection because it is sensitive Lawful basis for processing special category data Behaviour Files Guidance: Where files/folders contain sensitive information, secure them away at the end of each day. Do not display on walls
Is the room secure / locked? No	Are any computers unlocked? Yes	Do unlocked computers have applications open? Yes
Guidance: Review Physical Security Policy. Lock offices and ICT suites when not in use. Consider the use of keypads/fobs for access as this ensures the door is locked behind the person when leaving	Guidance: Review Information & Cyber Security Best Practice Never leave your computer unattended. Ensure you lock it and at the end of each day switch off your equipment. Store your laptops and mobile devices securely. Hint: A quick way of locking your laptop/PC is to use the Windows + L key	Guidance: Ensure an auto lockout is set for all computers appropriate to the role. Advise that staff are reminded not to rely on the auto lock out feature which may have been set. Review DPE Drip Feed poster for staff

News - I mentioned that the news area is updated regularly and that a new digest will also get sent out to any registered admins on the Knowledge Bank. The first email for St Bernadette's went out on the 31st May and comes from the email address kb@dataprotection.education. The frequency can be changed from your profile in the Knowledge Bank by clicking on your name (top right of the screen) and choosing 'keep in the know preferences'. The choices are weekly, fortnightly or monthly. Just a reminder that most of the links do not require a login to the Knowledge Bank so can be used as extra awareness for staff for data protection and perhaps could be mentioned in staff meetings in any data protection slot you may have.

Governor - you mentioned that there is a specific governor with data protection responsibilities.

Reports - we discussed the use of electronic school reports over paper reports. Where possible, we would recommend sending them electronically using the School Comms system, this then ensures it gets to the intended recipient and that any files relating to the pupil are attached to the pupil. If it is given to the child or put into a child's book bag there is a chance that it may be lost or not seen. It can save money. The option should be given for the parent to request a printed copy. Paper copies of files come with an increased data breach risk.

Third Party Supplier lists - I would recommend creating third party supplier lists in line with your privacy notices and then including the lists in each privacy notice. This article talks about carrying out supplier due diligence: <https://dataprotection.education/best-practice-update/296-due-diligence-step-by-step>

End of term checklist - we published a previous end of term checklist here: <https://dataprotection.education/best-practice-update/295-end-of-term-checklist> which we are currently updating, and will create in a downloadable document.

I will shortly send the invite through for my Making the Rounds visit in November - I look forward to seeing you then.

Have a lovely Summer!

Many thanks,

Tammy Buchanan
