Hi Nigel,

Thank you for your time yesterday and for showing me around your school. I have updated the Making the Rounds on the Knowledge Bank:

<https://dataprotection.education/courses-heading/making-the-rounds-log/item?id=95083>

If you go into view mode there will be some feedback in some of the areas which include links and information that you can send to staff if needed.

I have updated the DPO Feedback section with any additional advisories and changed the status to Action Required. You can then update the Actions Taken section with any changes you are able to make, and we can discuss at our next meeting.

Password checklist update:

With regard the below question we discussed:

Are IT staff the only administrators of the network? (staff, including SLT should not be administrators of the network)

I have put the following tooltip next to it:

IT staff include: ICT technician, Network Manager, IT Manager and Data Manager or someone with overall responsibility for IT in the school with the skills to perform server admin tasks.

Risk Register: the Key define the school risk register as:

A risk register is a document that allows senior managers and the governing board to plan for, track and monitor key risks and risk controls for the whole school or trust.

Risk registers record the main perceived risks to an organisation's financial or strategic aims.

Don't use a risk register to assess risks for specific activities or to plan for emergencies. Instead, use a risk assessment or a critical incident/disaster plan

There are lots of schools that publish their risk register and risk management policy on their websites which you could google. The school bus and other school advisory subscriptions for school management have further information.

NCSC Training: we discussed NCSC training which is here: <https://www.ncsc.gov.uk/information/cyber-security-training-schools> and is free and highly recommended. We also have a link on our website in the courses area if you want to use the Knowledge Bank to assign it to staff and track what they have done: <https://dataprotection.education/site-updates/291-assigning-users-to-courses>

Info for staff training: I mentioned some slides that might be useful for your training sessions which I have attached. Also keep any eye on the news page for any articles as this will give you a lot of resource: <https://dataprotection.education/news-top/news>

I spoke to our legal director about the following:

Verbal SAR requests - she did agree that a verbal request counts as a SAR. There's an article about them here: <https://dataprotection.education/best-practice-update/363-subject-access-requests-sars>

This is what the ICO say regarding how to recognise a request and how someone can ask:

Are there any formal requirements?

No. The UK GDPR does not set out formal requirements for a valid request. Therefore, an individual can make a SAR verbally or in writing, including by social media. They can make it to any part of your organisation and they do not have to direct it to a specific person or contact point.

A request does not have to include the phrases 'subject access request', 'right of access' or 'Article 15 of the UK GDPR'. It just needs to be clear that the individual is asking for their own personal data. Indeed, a request may be a valid SAR even if it refers to other legislation, such as the Freedom of Information Act 2000 (FOIA) or the Freedom of Information (Scotland) Act 2002 (FOISA).

Additionally, it is good practice to have a policy for recording details of the requests you receive, particularly those made by telephone or in person. If you receive a request verbally, you are still likely to need to contact the individual in writing in order to confirm their identity. You may also wish to check with the requester that you have understood their request, as this can help avoid later disputes. For more information please see ['Can we ask for ID?'](#).

Medical Information - she confirmed that it needs to be in a secure area, so the risk is yours to assess in terms of how secure the medical room is and if it is kept locked and who has access.

I am putting my booking link below so you can book the next online meeting for the Autumn term. Please use the link below to check my availability which will allow you to book a date and time that is suitable for you:

<https://go.oncehub.com/DPETammyBuchanan>

If you have any questions, please do not hesitate to contact me. Have a lovely Summer

Many thanks,

Tammy Buchanan
