Bcc: Tammy Buchanan &lt;tammy.buchanan@dataprotection.education&gt;

Hi all,

Thank you for your time on Tuesday and for showing me around your school, it is really appreciated. I have updated the Making the Rounds on the Knowledge Bank:

<https://dataprotection.education/courses-heading/making-the-rounds-log/item?id=95898>

If you go into view mode there will be some feedback in some of the areas which include links and information that you can send to staff if needed. I have added extra information at the end of the Word document that may be useful.

I have updated the DPO Feedback section on the Knowledge Bank with any additional advisories and changed the status to Action Required. You can then update the Actions Taken section with any changes you are able to make, and we can discuss at our next meeting.

I have also attached a Word copy for your convenience and emailed everyone that was included in the original meeting invite. As mentioned, these are recommendations which we would advise reviewing alongside any risks you are aware of in the school, which are different for every school.

While I was there Claire mentioned implementing multi factor authentication - I would recommend this, especially for the central team and SLT given they could be accessing SharePoint from home. It can be set up in such a way that it won't MFA on school devices while in school. This is the number one recommendation for improving cyber resilience. There are several articles on our news pages about how schools have suffered cyber attacks that you might find helpful. There is one about MFA here: <https://dataprotection.education/infosec/329-a-guide-to-multi-factor-authentication>.

If you have any questions, please do not hesitate to contact me.

Many thanks,

**Tammy Buchanan**
