Hi Alison,

Thanks for the update. That is good to know it is a school device - you could perhaps consider marking them in some way either with a pen or sticker/barcode to identify/track them?

It might also be worth considering what the procedure is for removing photos from the cards in that it should at least be done at the end of the academic year. And the procedure for when they are passed from one class/teacher to another. How that ownership is managed alongside the data on the cards. Perhaps review in conjunction with the acceptable use policy?

I hope the run up to the end of term is going OK for you.

Many thanks,
Tammy

Thank you Tammy.

That worked.

Just to let you know, I had conversations regarding the USB dongle and SD card. The camera is a school device. The SD card was out because it had become corrupt and Jonathan was trying to work out whether he could salvage anything from it. He found he could not. The USB dongle is for use with the SC cards and is the only one that is recognised as a proper device by our system. There are 11 of them total, all for the same purpose, for use with the school video cameras. Jonathan realises it should normally have been locked away but since nothing on it was accessible no one would have been able to access it in any case.

I am working through the rest of the items and have fed back to Verity on your visit and report. I will update the portal once I have concluded.
