

School: Lighthouse Federation

Date: 27/06/23

Report: Onsite consultation

DPE: Stuart Lee
(Min) May (AM)

Staff member: Maureen Burns (MB). Amanda

Introduction

The meeting was arranged to support the school with any outstanding compliance actions and ensure the school made best use of the DPE subscription and DPE resources. The federation schools (admin users) should also be receiving regular 'data protection - keep in the know' emails to keep them updated regarding any changes to legislation, policy updates and general things to be aware of i.e. cyber security risks.

MB is the interim headteacher. There will be a new headteacher for September 2023. The federation is also part of the DIOCESE of Norwich.

The meeting included AM, the school governor responsible for data protection. Due to headship changes the meeting also allowed for reestablishing data protection priorities and contacts. A meeting was also arranged for **October 4th 2023** to include the new head teacher. This will also allow for organising a visit that will include a physical data audit.

Discussion agenda and follow up actions detailed below:

1. Compliance documents:

SL reviewed the federations compliance documents prior to the meeting and ascertained that these require updating.

Although not all the following documents are statutory to have displayed on the website the initial documents include:

- Data protection policy
- General Privacy Notice
- Student/parent privacy notice
- Workforce privacy notice
- Supplier/third party list – referenced in each notice, who you share information with
- SAR and data breach procedures can also be displayed – optional.

Actions: SL will send the latest DPE documents to the school with the third party list to check against. The third party list can be displayed as a separate document.

2. Staff training and set ups

SL suggested staff complete Stay Safe Online NCSC and GDPR refresh training and this training should be part of the induction process for new staff. Staff lists should also be accurate.

Actions:

- A remote consultation was arranged for **11th July 2023 – 11.30** with Julia Pagan (office manager) to demonstrate maintaining staff lists and sending to-do emails for staff training etc.
- Staff to be sent an email prior to being set up for DPE training to make them aware that an email will be sent to them with links for the training.
- Staff to complete Stay Safe Online and GDPR refresh training and this should be part of the induction process for new staff.
- Add AM as a Trustee/governor role to the organisation's staff list.

3. Information security

The NCC themed cyber security audit (summer 2022) and DPE cyber and information security checklist best practice area were discussed including risks the educational sector faces. If the federation has not completed the original NCC thematic cyber recommendations, SL advised that the DPEs cyber and [information security checklist](#) is completed with the federations IT provider.

Actions:

- The federation can start the process of completing DPE's cyber and information security checklist available from DPEs best practice area cyber and information security best practice area. **Select:** Info/Cyber security checklist.
- Information security and the checklist to form part of the 4th October 2023 meeting with the new head teacher.

4. Follow ups and next steps:

- Complete the above **actions**
- Data retention
- Publication scheme and additional compliance documents
- Physical audit walk
- Making best use of the DPE website and resources
