

School: Bressingham Primary

Report: Remote consultation

DPE: Stuart Lee

Staff member: Joanna Lewis

Audit walk recommendations

The school has worked through and continues to complete the previous audit report recommendations (17/05/23) for example, adding secure codes to the school iPads.

Compliance documents

SL previously provided DPEs privacy documents to JL, who has tailored to the school setting. SL mentioned that DPE were adding some amendments to the privacy and policy documents. As the documents sent by SL have now been ratified, SL confirmed that documents are fine as they are and can be updated at the next policy review. The school also has the option to send to SL, who will update with any amendments during the Autumn term 2023.

Link to the consent policy documentation discussed is [here](#).

Information/cyber security and staff training

The school has now adopted DPEs BYOD policy and has/will start to work through the [cyber security checklist](#) with their IT provider.

Training has/is being implemented, including for new staff members. DPE recommended training is:

- GDPR refresh (if is more than 2 years since training has been completed)
- Stay safe online NCSC training.

The school also has the option to complete the training as a group at an INSET session.

Next steps

- The school is migrating to Arbor for the school's MIS system. SL recommended that a data protection risk assessment and record of processing is completed. A generic process risk report is attached to support the process. SL will go over in more detail with JL during the October 19th remote consultation.
