

School: All Saints School - Lessingham

Date: 25/05/23

Report: Onsite visit

DPE: Stuart Lee **Staff member:** Meeting with Rachel Smith (Director), Tracey Buchan and Heather Duxbury (Advisor – Chair)

Agenda/discussion items

Introductions

1. Where are you at (review of status)? How we can support you
2. Staff training and raising staff awareness
3. Staff changes and maintaining staff lists - housekeeping
4. Information security
5. Record of Processing and supplier due diligence - what's next with any new legislation changes
6. Data retention (IRMS)
7. Confirm future appointments
8. Audit walk

Summary and data protection status

The school has recently bought in to the DPE service and had previously completed a remote consultation with Kalina who demonstrated the DPE website and resources. From this, an onsite meeting was arranged to determine the base line for the school's privacy programme and plan going forward. The onsite visit also included an audit walk.

The audit walk and feedback can be viewed here: [94708](#)

The school is an independent school (Y7 – Y11) with 100% EHCP students. The school therefore processes a large amount of sensitive data daily. The school exhibited excellent data protection practices; key policies displayed on the school website; SAR/breach log; working data retention schedule; staff training; record of processing and staff awareness completed on a regular basis. The physical audit walk was evident of this; with mainly positive feedback.

Net Central completes external support with IT support being provided internally by a staff member (Mark). Mark oversees and monitors internally cyber and information security. The school were also signposted to the information security best practice area. Staff lists were imported during the visit and staff will be set up to complete the Stay Safe Online National Cyber Security Centre training.

The school has a breach and SAR log that has been maintained and has also completed their own data mapping and record of processing activity. SL recommended that the school now uses the DPE logs available from the DPE dashboard so that data breaches/SARs are logged centrally and can also be tracked and responded to by the compliance team.

Internal audit walks are completed and the school raise staff awareness in a timely manner.

The school's retention schedule is incorporated within the data retention policy and is used as a working document.

Next steps – follow up actions:

- Complete any outstanding actions from the audit walk
- The school can start to make use of the DPE SAR and data breach log for recording SARs and data breaches; which will mean DPEs compliance team can provide support as necessary. Tickets should also be logged using the dpo@dataprotection.education email
- SL to review the school's data protection documents with the latest DPE privacy documents – Autumn term 2023.
- Staff to complete cyber security/ Stay Safe Online NCSC training.
- Follow up remote to demonstrate DPEs Record of Processing and risk assessment tool (Autumn 2023).
- Supplier due diligence and update supplier/third party list on the DPE website
- Additional compliance documents
