

School: Heigham Community Federation

Date: 07/09/23

Report: Onsite consultation

DPE: Stuart Lee

Staff members: Michael Bunting (Executive headteacher), Mike Hooper (HT), Denise (HoS), Jen Carlin (federation SBM) and Linda Furzer (federation office team manager)

Introduction

The meeting was arranged to support the federation with any outstanding data protection compliance actions and determine a plan/actions that can be worked on for 2023/24. In addition to outlining the federation set up and roles/responsibilities two key areas were determined to be the initial focus:

- Compliance documents
- Staff training and awareness

Meeting discussions regarding set ups for the federation and the two above key actions to complete have been listed below and follow ups/next steps are then included at the end of the report.

The federation schools (admin users) also receive regular 'data protection - keep in the know' emails to keep updated regarding any changes to legislation, policy updates and general things to be aware of i.e. cyber security risks.

Discussions and follow up actions detailed below:

Federation view and set ups

Due to the schools recently federating and staff role changes, some DPE organisational changes were required to be set up on the DPE website to utilise the resources and support monitoring effectively as a federation. The schools were currently set up on the DPE website as individual schools. Discussion took place regarding setting the school up as a federation with the exec head and admin leads having a federation view (both schools combined for an overall view).

Actions:

- The Federation to be set up on the DPE website.
- The following users to be set up with a federation view by DPE:

Michael Bunting

Jen Carlin

Lisa Furzer

- A follow up remote meeting to be arranged with Jen and Linda to support compliance actions etc.

Compliance documents:

SL reviewed the federations compliance documents (via individual school websites) prior to the meeting and ascertained that the documents displayed will require updating at some point. **Although not all the following documents are statutory to have displayed on the website the initial documents to be updated include:**

- Data protection policy
- General privacy notice
- Student/parent privacy notice
- Workforce privacy notice
- Supplier/third party list – referenced in each notice, who you share information with

Actions:

- The federation to update the data protection policy and privacy notices and have one copy that can be used for the federation.
- The SAR and data breach procedures can also be displayed although this is optional.

All the above documents can be located within the [compliance best practice](#) area and examples of layouts and maintenance routines can be located in the [schools and trusts best practice area](#) (return to school, maintenance tasks tabs and website example tabs).

Additional documents to check you have include:

- [Consent policy](#)
- [FOI/publication scheme](#) (the publication scheme can be added as an appendix in the current policy)
- [Retention schedule](#)

It was confirmed that the consent documentation is listed as an appendix in the data protection policy.

Staff training and set ups

SL suggested staff complete **Stay Safe Online NCSC and GDPR refresh training** and this training should be part of the induction process for new staff. Staff lists should also be accurate and updated on the DPE website.

Actions:

- Administrators to check and update DPE staff lists as appropriate.
- Staff to complete Stay Safe Online NCSC and GDPR refresh training and this should be part of the induction process for new staff. The guide for sending emails to staff to complete training is located [here](#).
- Administrators to familiarise themselves with the [schools and trusts best practice area](#) and check on any outstanding action requirements.
- SL to complete a remote session with Jen and Linda to support the above process.

Follow ups and next steps:

- Complete the above **actions** including staff training and raising staff awareness.
- SL to complete a remote session with Jen and Linda to support the above actions.
- Physical audit walk to be completed (November 27th 2023) and audit findings fed back to governors.
- Focus on risk management and cyber/information security.
- Additional compliance document considerations.
