Hi both,

Following our meeting I have reviewed the three Making the Rounds that you have completed on the system. The app has been updated in the last few months, so if you view each one by clicking on the id number of the Making the Rounds, you will see any feedback with links immediately:

Location and observations:

Location
Classroom

Is there personal information on display?
Yes

Guidance: Review [DPE Quick Reference Guide](#)

0
Are any of these types of data visible or locations and devices easily accessible?
Care plans

Care Plans Guidance: DfE guidance is that any information relating to such data as:
• A safeguarding matter
• Pupils in receipt of pupil premium
• Pupils with special educational needs and disability (SEND)
• Children in need (CIN)
• Children looked after by a local authority (CLA) It is best practice to also treat as special category data. Special category data is considered more sensitive and given greater protection in law: [Displaying Special Category](#)

Additional feedback - an unlocked cupboard/classroom or computer does not need to be reported if the person is in the room, only if the room is empty.

The risk of anything unlocked increases if non-employees are in the school.

There are a lot of care plans out and available, so would also suggest a review of this article about displaying special category information generally: <https://dataprotection.education/best-practice-update/388-displaying-special-category-information-in-schools>

Review of lockout procedures for computers

Review of physical security.

For your information when using the app, you can select 'usernames and passwords' as personal data, and this will give you the relevant feedback.

I have set the status on all three to be Action Required, and updated the DPO feedback areas. This now gives you the opportunity to advise staff. If any actions are completed, please update the Actions tab and mark it as complete.

Please do not hesitate to contact me if you have any queries,

Many thanks,

Tammy Buchanan
