

School: Hethersett Woodside Onsite Consultation Date: 16/11/2023

DPE: Stuart Lee School member: Louise Mainwaring (LM)

Consultation details:

As LM has just taken up the head teachers post, the focus of the consultation was to identify where support was needed; compliance documents; training; roles and responsibilities. LM will update SL regarding who in addition to LM will be the contact person for future data protection meetings. A brief walk of key offices and the staffroom was also completed.

DPE website/best practice including staffing changes

Staff lists are up to date. The school has good leaver/recruitment processes in place i.e. checklists to check against for leavers and new starters. Staff are set up correctly on systems and for DPEs data protection training; which forms part of the induction process for new staff. A brief demonstration of the latest DPE features was completed and LM was signposted to the schools and trusts best practice area.

Compliance documents

The school has a GDPR section on the school website.

Actions:

- The original school GDPR statement (newsletter) detailed on the school website can be removed and replaced with text on the DPE example website layout. Example website layout can be viewed here: [schools and trusts BP](#)>website example.
- The workforce and general privacy notice and third party list can be added to the data protection area of the school website.
- The SAR and data breach procedure will require key contacts updating and both Stuart Lee and James England removed as a contact and replaced with: Data Protection Education Ltd as the named DPO.

Note: DPEs policy and privacy notices were updated over the summer 2023. The current school policy and privacy notice that is displayed is fine as it is for now and can be updated when possible, or at the next review.

Review of training and information security

Most staff have completed GDPR and NCSC Stay Safe Online Training and data protection training is part of the induction process for new staff.

Actions:

- SL to update LMs training record to reflect training completed at the previous school.
- The school to follow up with any staff where training has not been completed. DPE's [to-do](#) tool can be used to assign and email staff.
- Consider completing and reviewing actions from DPEs [information security checklist](#) with the schools IT provider and sharing with governors.

Audit walk

A part audit walk of a selection of offices and the staffroom was completed. Overall this was very positive with minimal data on display and online systems being utilised for storing sensitive information. A further afterschool walk will be completed in the Spring/Summer term.

Walk actions:

- Add secure entry to senior staff offices; headteachers; leadership teams and SENCOs office etc.
- Investigate adding secure printing to the photocopiers. Not only will this reduce risks but also have positive cost implications in less wasted paper/printing.
- Add confidential monitor screens to the front office corner monitor; business managers monitor and headteachers monitor. In addition, review if any other monitors would benefit from confidential screens.
- Add the following statement to the visitors sign in system: Visitor information is collected for health and safety, record of official visits and safeguarding. If you would like to know more, the general/visitors privacy notice is available on the school website, or you can ask at reception for a paper copy.

Follow up/next steps:

- Determine staff member(s) to work with SL for data protection and set up a remote consultation.
- Update school website compliance documents detailed above.
- Determine and update additional compliance documents.
- Follow up with staff yet to complete training.
- After school walk to be completed Spring/Summer 2024.
- Additional focus on supplier due diligence/risk assessments, information security and data retention.
