

School: Bressingham Primary

Report: Remote consultation - 23/11/23

DPE: Stuart Lee **Staff member:** Joanna Lewis

Compliance documents and schools best practice area

Reminder of the [schools and trusts best practice](#) where we have listed many of the key actions/tasks that should/can be completed. For example, maintaining staff lists on the DPE website, training and policy updates etc. The main tabs to check out are: return to school, maintenance, end of year and example school website layout. The school has consent policy/statements within other compliance documents; therefore will not need to adopt DPEs consent policy.

Follow ups/actions:

- The schools **data protection policy and privacy notices** will be reviewed by SL at the next policy review.
- The **publication scheme and FOI policy** to be amalgamated by SL and sent to JL (attached). JL to tailor to the school setting. SL confirmed that a link to the schools website policy documents can be added rather than duplicating and displaying policy names separately. Once completed this will be added to the school website.

Information/cyber security and staff training

The school has now adopted DPEs BYOD policy and Stay Safe Online/Cyber security training was completed summer 2023. The school will repeat the process every 2 years and rotate between information security and data protection training. The school will also raise awareness on an ongoing basis.

Follow ups/actions:

- JL will revisit the [cyber security checklist](#) with their IT provider. This can be used as a working document and shared with governors. SL to support if JL has any queries or follow ups.

Follow ups/ next steps

- The school is migrating to Arbor for the school's MIS system. SL signposted JL to the [data migration](#) best practice area and examples and advice. This can be referred to if/when a decision is made regarding migrating to a new provider.

- Supplier due diligence and next step meeting arranged for February 2024.
- SL to follow up with James England (JE) in relation to issues Jo had with training that was completed over the summer; didn't get replies to emails and some staff unable to access the system. SL mentioned that sometimes it can be the users home setup i.e. CASHE needs emptying etc. JL and SL also discussed if there could be a manual override to amend training records where staff have completed but this still shows as: incomplete. SL to follow up with JE.
