Password

People

Are the access rights available to groups of users clearly defined and documented?

To Do In-progress Done

Do staff, pupils and other users understand their responsibilities regarding passwords?

To Do In-progress Done

Is regular training/reinforcement provided on password best practice?

To Do In-progress Done

Does the network manager keep a log of User IDs and requests for password changes?

To Do In-progress Done

Are staff aware they should not write their passwords down?

To Do In-progress Done

Is there a school password policy?

To Do In-progress Done

Are security incidents related to this policy monitored and documented?

To Do In-progress Done

IT providers should not use generic administrative accounts when completing administrative tasks for the school

To Do In-progress Done

Is the audit trail for the IT engineer's administrator account regularly reviewed to ensure only appropriate and authorised changes are made?

To Do In-progress Done

Is there a list of all administrator accounts and which users have access to them?

To Do In-progress Done

Are IT staff the only administrators of the network? (staff, including SLT should not be administrators of the network)

To Do In-progress Done

Does the main IT engineer administrator account have MFA enabled?

To Do In-progress Done

Are new staff members provided with passwords in a secure way?

To Do In-progress Done

Technology

Is two/multi factor authentication implemented?

To Do In-progress Done

Is single sign-on used for systems which allows staff to use just one set of credentials to automatically gain access to multiple applications and services?

To Do In-progress Done

Are password deny lists used which prevent commonly used passwords? (such as Password123)

To Do In-progress Done

Are password minimum lengths set?

To Do In-progress Done

Is account locking implement following several (e.g. six) unsuccessful logon attempts?

To Do In-progress Done
